Bottlenecks Joseph Fishkin,2014-01-10 Equal opportunity is a powerful idea and one with extremely broad appeal in contemporary politics political theory and law But what does it mean On close examination the most attractive existing conceptions of equal opportunity turn out to be impossible to achieve in practice or even in theory As long as families are free to raise their children differently no two people s opportunities will be equal nor is it possible to disentangle someone s abilities or talents from her background advantages and disadvantages Moreover given different abilities and disabilities different people need different opportunities confounding most ways of imagining what counts as equal This book proposes an entirely new way of thinking about the

project of equal opportunity Instead of focusing on the chimera of literal equalization we ought to work to broaden the range of opportunities open to people at every stage in life We can achieve this in part by loosening the bottlenecks that constrain access to opportunities the narrow places through which people must pass in order to pursue many life paths that open out on the other side A bottleneck might be a test like the SAT a credential requirement like a college degree or a skill like speaking English It might be membership in a favored caste or racial group Bottlenecks are part of the opportunity structure of every society But their severity varies By loosening them we can build a more open and pluralistic opportunity structure in which people have more of a chance throughout their lives to pursue paths they choose for themselves rather than those dictated by limited opportunities This book develops this idea and other elements of opportunity pluralism then applies this approach to several contemporary egalitarian policy problems class and access to education workplace flexibility and work family conflict and antidiscrimination law

Biotechnology Dr. Suniti Kumar Kuriyal, Dr. Pankaj Bahuguna, Dr. Pratibha Baluni, Pooja Kuliya, 2026-02-13 Biotechnology is a comprehensive academic text that explores the principles techniques and applications of modern biotechnology in science medicine and industry The book covers key topics such as molecular biology genetic engineering recombinant DNA technology cell culture fermentation technology bioprocess engineering and bioinformatics It also examines applications in healthcare agriculture environmental management and industrial production including the development of vaccines genetically modified organisms and biopharmaceuticals By integrating theoretical concepts with practical examples case studies and laboratory techniques the text provides students with a solid foundation in understanding and applying biotechnological innovations Suitable for undergraduate and postgraduate students in biotechnology life sciences and related disciplines

Route Maps in Gene Technology Mark Walker, Ralph Rapley, 2009-07-17 *Route Maps in Gene Technology* is an exciting new introductory textbook for first year undergraduates in molecular biology and molecular genetics The subject is broken down into 140 to 150 key concepts or topics each of which is dealt with in one doublepage spread These range from basic introductory principles to applied topics at the cutting edge of research A control strip along the top of the page shows the student which pages need to have been read beforehand and which topics may be followed afterward In addition at the front of the book are a selection of routes which the student or teacher may choose in order to study a particular topic Because courses have become more modular and many students arrive at college with little or no biology background this approach enables teachers and students to structure a course of study to best suit their disparate exposure to biology An exciting new concept in textbook design allowing unparalleled flexibility on the part of the student and the teacher Covers the full range of modern molecular biology from basic principles to the latest applications Attractive clear and simple presentation with copious two colour illustrations
