Forthcoming Books Rose Army,2004 **An Architecture of the Mind** Brendan Markey-Towler,2018-03-14 An Architecture of the Mind proposes a mathematically logical and rigorous theory of lived experience and a comprehensive and coherent theory of psychology It is also remarkably simple Building on the core proposition that the mind is a network structure it proposes a theory of the psychological process as operating within and upon that structure and a theory of behaviour as determined by that process The theory presents a view of the mind which reveals a new perspective on the process of reasoning in thinking and how it may coexist with processes more akin to simple rule following and computation It allows us to understand the role and influence of social influences in the psychological process by revealing their role in and influence on mental networks It reveals the place of motivations in the psyche as complexes in mental networks from whence aesthetics preference and value judgements arise and demonstrates their necessity for behaviour This book is especially

useful for the perspective it offers on behavioural change It reveals the conditions under which traditional economic theories of incentives will be appropriate and the conditions under which they will not be This book draws on psychology social science cultural science neuroscience and economics to offer an interdisciplinary contribution which resists the tendency for disciplines to become over specialised and fragmented It will be of interest to any interested in the functioning of the human mind and the government of human behaviour **The Writers Directory** ,2013
