Tanker Management and Self Assessment OCIMF.,2017 *Management of Shipping Companies* Ioannis

Theotokas,2018-04-19 The maritime sector is dynamic and volatile creating the need for continuous monitoring of the latest developments and their effects on the organisation management and strategies of shipping companies This book analyses the business environment of these companies and the approaches they adopt in organising and managing their activities

Management of Shipping Companies aims to facilitate the learning and understanding of the fascinating world of shipping business It examines the organisation and management of companies which manage ocean going ships emphasising the special characteristics of the industry and the framework created by these This textbook offers a detailed account of the companies processes and functions the structural and contextual dimensions of their organisation as well as an analysis of human resources safety management and the outsourcing of shipping operations Written in an easily digestible and critical manner it includes case studies and analysis of best practices implemented by companies worldwide This unique and accessible book is an ideal text for students in maritime studies programs as well as readers interested in learning about maritime businesses organisation and management Commercial Marine Shipping Accidents Workshop Steering

Committee on the Risks of Marine Shipping in Canadian Waters,2016-04-28 Canada s economic and social development has benefited immensely from centuries of marine shipping Today the industry supports economies from coast to coast to coast shipping hundreds of millions of tonnes of cargo ranging from fuels to food to consumer goods lining store shelves The shipping industry is important to the livelihood of Canadians but has also faced increased public scrutiny in recent years The risks associated with opening the Arctic to greater ship traffic increasing marine shipments of oil from Canada s oil sands and the growth in vessel size especially of container ships have all contributed to this discussion Recognizing the need for consensus building research in this area the Clear Seas Centre for Responsible Marine Shipping asked the Council of Canadian Academies to convene an expert workshop to identify the risks associated with commercial marine shipping in major Canadian shipping regions The final workshop report *Commercial Marine Shipping Accidents Understanding the Risks in Canada* identifies the risks of commercial marine shipping accidents across Canada s regions and for different cargo types while highlighting gaps in understanding and areas for further research The workshop report brings together perspectives from academia government and industry and is informed by evidence from a survey of the marine shipping community and an extensive review of the existing literature It can be used as a tool for policy makers to help inform decisions related to managing the risks of commercial marine shipping accidents Overall this workshop report seeks to contribute to a national dialogue about acceptable levels of risk in commercial marine shipping *Reeds 21st Century Ship Management* John W

Dickie,2014-04-17 The first modern title to cover the varied and complex world of ship management in the 21st century Ship management has constantly had to evolve to take into account the advancements in technology as well as the demands of the

shipping industry Having internet access and email on board ship has meant that the ship manager has to possess certain sets of skills to function effectively in the post including computer literacy The emergence of large multi national ship management companies has also changed how business is conducted and this in turn means that the ship manager and tiers of management within the organization have had to evolve to cope with the demands of working with a multi national workforce Furthermore since the mid 1980s there has been an ever expanding raft of legislation that is more restrictive for companies to meet and a shrinking of profit margins has seen a shift in how companies are required to operate to survive This book addresses the demands of 21st century ship management with the focus of the book as much on the people who manage ships as on the theory and practice of ship management
