Boeh, Paul W. Beamish, 2007 Mergers and Acquisitions Text and Cases provides guiding frameworks and information on Mergers and Acquisitions M A complemented by a set of well matched cases The purpose is not to rehash the existing set of M A books but to provide real world examples of situations that allow the reader to utilize the core concepts and processes in M A The authors present a process based framework of M A within which the reader is given in depth information about the steps in doing deals The reader then has the ability to apply these concepts and frameworks to the full length cases The book can be used as a stand alone text because it provides good coverage of the entire M A process In order to more specifically focus on any particular aspect of M A the text can easily be supplemented with focused materials *Petroleum Review*, 2008 *The Acquisition of Anadarko by Chevron. Discounted Cash Flow Analysis* Dominik Heller, 2021-05-05 Bachelor Thesis from the year 2020 in the subject Business economics Investment and Finance grade 1 3 University of Mannheim Chair of Corporate Finance language English abstract In this thesis I am going to value Anadarko using the Discounted Cash Flow DCF method and applying reasonable assumptions for post merger synergy effects with Chevron As validation for my forecast assumptions which are based on predictions and trends from early 2019 I will include a summary of the overall Oil Gas industry as well as Anadarko's and Chevron's positioning alongside the different stages of the value chain To estimate my cost of capital I will apply the WACC

method instead of APV using the cost of equity and cost of debt as input factors together with a terminal growth rate instead of an approach with exit multiples In order to determine how sensitive my results are concerning key input variables like the Weighted Average Cost of Capital WACC or the terminal growth rate I will also run a sensitivity analysis Lastly I will talk about the synergy estimates used in my calculations and bring them into context with my DCF calculations in order to determine if the transaction would create value for shareholders on both sides of the deal Although my calculations ultimately lead me to the result that the price originally offered by Chevron was fair both in regards to Anadarko s share price prior to the deal announcement as well as the intrinsic value determined by my DCF the deal would not have benefited shareholders on both sides equally While Anadarko s shareholders would have gotten an immediate double digit price increase Chevron shareholders would have lost value with the acquisition despite my calculations including significant synergies of roughly 1bn per year The goal of my thesis however is not only to describe the assumptions calculations and results of my DCF analysis but to also bring them into a wider context On 12th April 2019 Chevron Corporation announced that they have agreed to acquire all outstanding shares of Anadarko Petroleum Corporation for a total consideration of 65 per share This marked the first major transaction announcement for quite a while in the Oil Gas O G industry which previously saw stock prices near their 10 year lows Despite a good initial reaction from Anadarko s shareholders Chevron ended up missing out on the deal with Occidental Petroleum Corporation a close peer of Anadarko buying the company for 76 67 per share
