OpenCV Computer Vision Application Programming Cookbook *Second Edition*

OpenCV Computer Vision Application Programming Cookbook Second Edition is your guide to the development of computer vision applications.

The book shows you how to install and deploy the OpenCV library to write an effective computer vision application. Different techniques for image enhancement, pixel manipulation, and shape analysis will be presented. You will also learn how to process video from files or cameras and detect and track moving objects.

This book is a comprehensive reference guide that exposes you to practical and fundamental computer vision concepts, illustrated by extensive examples.

What this book will do for you...

- Install and create a program using the OpenCV library

- Process an image by manipulating its pixels

- Analyze an image using histograms

- Segment images into homogenous regions and extract meaningful objects

- Apply image filters to enhance image content

- Exploit image geometry in order to relate different views of a pictured scene

- Calibrate the camera from different image observations

Inside the Cookbook....

- A straightforward and easy-to-follow format

- A selection of the most important tasks and problems

- Carefully organized instructions for solving the problem efficiently

- Clear explanations of what you did

- Apply the solution to other situations
