You're now responsible for a programme or you've got a portfolio to manage Where do you start Right here Projects are not simply the bread and butter of an organisation Form them into programmes or portfolios and they can be prioritised and integrated to deliver change to your organization in line with your strategic vision You will be able to control costs and risks and bring together a complex series of themes effectively This overhauled second edition now combines portfolio management as a parallel theme with programme management and it is brought in line with the current thinking of the Association for Project Management and the Project Management Institute It is written for managers in both the public and

private sectors This new edition includes half a dozen short case studies from Belgium's Fortis Bank a software company local government and central government along with more on cross functional management Together with Project Management Demystified also from Routledge third edition 2007 it provides the tools to manage your projects your programmes and your portfolio to a very high level The IT Service Part 2 - The Handbook Pierre Bernard,1970-01-01 Since the early 2000s numerous external scenarios and drivers have added significant pressures upon the IT organisations Among many these include Regulatory compliance data privacy requirements and corporate scandals have focused a requirement for transparency with high impact on IT organisations Economic pressures require IT organisations to more closely align with business imperatives The outcome has been an explosion of standards and frameworks each designed to support the IT organisation as it demonstrates to the world that they are the rock of an organisation strong reliable effective and efficient Most of these standards and frameworks have great elements but no organisation can adopt them all and many were created without sufficient considerations for interoperability The IT Service in 2 parts looks at the key and very simple goals of an IT organisation and clearly and succinctly presents to the reader the best rock solid elements in the Industry It then shows how all the key elements can easily crystallise together with great templates and check lists In Part 1 another book the reader is presented with the simple objectives that the IT department really must address In Part 2 this book the reader gains expert advice on how the components of IT Service are crystallised in a real environment There's a delightfully simple set of steps OVERVIEW OF THE SERVICE DESIGN PACKAGETHE SERVICE STRATEGYASPECTS OF SERVICE DESIGNOUTPUTS OF THE SERVICE DESIGN PHASEOUTPUTS OF THE SERVICE TRANSITION PHASEOUTPUTS OF THE SERVICE OPERATION PHASEWithin these the Author gives a very simple set of templates or tells you where they are to be found practical guidance and very simple checklists It's up to the reader how far you develop each stage a lot depends on the nature of your business of course The joy of this approach is that the reader knows that all basic components are identified and that more extensive resources are referred to if the reader wishes to extend

Value Management Roger H. Davies,2016-02-17 Change programmes in both private and public sectors have a poor record of delivering their intended value The reasons given most often for their failure include lack of executive support or buy in from key users loose requirements definition weak programme management and plain wishful thinking

They rarely include technical limitations Value Management puts forward the view that the true problem lies in failing to understand the causal links between the intended stakeholder outcomes and the actual programme outputs Repeating the pattern of failure can be avoided by asking two questions Before implementation what capabilities must a change programme deliver when and in what order so as to cause intended value against a defined purpose with speed and certainty During and after implementation what minor adjustments and or major shifts are needed to be certain that the programme remains on purpose and on value and two answers to be given Target time and align change programmes to deliver maximum intended value to stakeholders the baseline business case track and respond to changes during and beyond implementation to ensure that the programme actually delivers or exceeds intended value value realisation The authors show how by asking and answering these questions direction and delivery of any programme can be clarified and greater economic value achieved
