Procurement Systems A Guide To Best Practice In Construction:

Procurement Systems Steve Rowlinson, Peter McDermott, 2005-10-09 This book deals with best practice in construction procurement the process by which customers of the construction industry go about procuring new facilities

Understanding the Construction Client David Boyd, Ezekiel Chinyio, 2008-04-15 This book breaks new ground by creating a framework to understand clients actions and needs Most construction management books focus on improving the construction process this one focuses on a better engagement with the client It challenges conceptions of both the construction industry and clients businesses so that a more effective process and greater client satisfaction can be achieved The book suggests that buildings are not about building but about changing and developing the client The technical organisational and psychological aspects of this are described and analysed in detail so that current experience can be explained and better practice determined The book offers well researched information about clients in a number of sectors developers supermarkets NHS government airports and housing associations which will help you understand what these client s business or service needs are and how construction fits into this It demonstrates how to develop an appreciation of the client s perspective with a toolkit for ensuring successful client engagement This makes *Understanding the Construction Client* a user friendly and practical guide as well as significant text for academia

Knowledge Management in the Construction Industry Abdul Samad Kazi, 2005-01-01 Annotation Presents a portfolio of concepts methods models and tools supported by real life case studies from various corners of the globe providing insights into the management of knowledge in the construction industry

Sustainable Construction Technologies Vivian Y. Tam, Khoa N. Le, 2019-01-03 Sustainable Construction Technologies Life Cycle Assessment provides practitioners with a tool to help them select technologies that are financially advantageous even though they have a higher initial cost Chapters provide an overview of LCA and how it can be used in conjunction with other indicators to manage construction Topics covered include indoor environment quality energy efficiency transport water reuse materials land use and ecology and more The book presents a valuable tool for construction professionals and researchers that want to apply sustainable construction techniques to their projects Practitioners will find the international case studies and discussions of worldwide regulation and standards particularly useful Provides a framework for analyzing sustainable construction technologies and economic viability Introduces key credit criteria for different sustainable construction technologies Covers the most relevant construction areas Includes technologies that can be employed during the process of construction or to the product of the construction process i e buildings Analyzes international rating systems and provides supporting case studies
