

Binomial Tree Model For Convertible Bond Pricing Within

Atsuo Konishi, Ravi E. Dattatreya

Binomial Tree Model For Convertible Bond Pricing Within:

Bond and Money Markets Moorad Choudhry, 2003-07-04 The Bond and Money Markets is an invaluable reference to all aspects of fixed income markets and instruments. It is highly regarded as an introduction and an advanced text for professionals and graduate students. Features comprehensive coverage of Government and Corporate bonds, Eurobonds, callable bonds, convertibles, Asset backed bonds including mortgages and CDOs, Derivative instruments including futures, swaps, options, structured products, Interest rate risk, duration analysis, convexity and the convexity bias, The money markets, repo markets, basis trading and asset liability management, Term structure models, estimating and interpreting the yield curve, Portfolio management and strategies, total return framework, constructing bond indices. A stand alone reference book on interest rate swaps, the money markets, financial market mathematics, interest rate futures and technical analysis. Includes introductory coverage of very specialised topics for which one previously required several texts such as VaR, Asset liability management and credit derivatives. Combines accessible style with advanced level topics. *Advanced Fixed Income Analysis* Moorad Choudhry, Michele Lizzio, 2015-08-28 Each new chapter of the Second Edition covers an aspect of the fixed income market that has become relevant to investors but is not covered at an advanced level in existing textbooks. This is material that is pertinent to the investment decisions but is not freely available to those not originating the products. Professor Choudhry's method is to place ideas into contexts in order to keep them from becoming too theoretical. While the level of mathematical sophistication is both high and specialized, he includes a brief introduction to the key mathematical concepts. This is a book on the financial markets, not mathematics, and he provides few derivations and fewer proofs. He draws on both his personal experience as well as his own research to bring together subjects of practical importance to bond market investors and analysts. Presents practitioner level theories and applications never available in textbooks. Focuses on financial markets, not mathematics. Covers relative value, investing, returns analysis and risk estimation. **Pricing and Hedging Credit Risk in Convertible Bonds**, 1999 **Corporate Bond Markets** Moorad Choudhry, 2011-12-14 Moorad continues to demonstrate his financial expertise and shows us why he is one of the best selling authors in our industry today. Eric Subliskey, Vice President, Short Term Fixed Income, JPMorgan Securities Inc, New York. An invaluable reference work for anyone connected with the corporate debt markets, be they issuer, investor or trader. Dr Choudhry writes in his trademark accessible style and provides the reader with a wealth of data and insight on the latest market products and techniques. Highly recommended. Ketul Tanna, Assistant Vice President, Market Risk Management, JPMorgan Chase Bank, London. The predominant fixed income author is back with this updated version of Corporate Bond Markets. A comprehensive work on fixed income products and applications, this book is a valuable reference text and teaching tool. Why go anywhere else for bond market information? Rod Pienaar, Research Partner, YieldCurve.com **Corporate Bonds and Structured Financial Products** Moorad Choudhry, 2004-06-08 This book is a detailed account of the instruments that are used in the corporate

bond markets from conventional plain vanilla bonds to hybrid instruments and structured products There is background information on bond pricing and yield as well as a detailed look at the yield curve The book covers the full set of instruments used by companies to raise finance and which are aimed at a wide range of investors It also discusses the analysis of these instruments Topics covered include Bond basics The yield curve Callable bonds Convertible bonds Eurobonds Warrants Commercial paper Corporate bonds credit analysis Securitisation Asset backed securities Mortgage backed securities Collateralised Debt Obligations Synthetic CDOs Written by one of the leading names in the fixed income markets today this book should prove to be an invaluable reference guide for all those with an interest in corporate bond markets whether as practitioners consultants or researchers Covers every major aspect of corporate credit markets Features bond instruments as well as aspects of bond analysis Covers conventional bonds as well as securitisation and structured financial products

The 19th International Conference on Industrial Engineering and Engineering Management Ershi Qi, Jiang Shen, Runliang Dou, 2013-06-03 The International Conference on Industrial Engineering and Engineering Management is sponsored by the Chinese Industrial Engineering Institution CMES which is the only national level academic society for Industrial Engineering The conference is held annually as the major event in this arena Being the largest and the most authoritative international academic conference held in China it provides an academic platform for experts and entrepreneurs in the areas of international industrial engineering and management to exchange their research findings Many experts in various fields from China and around the world gather together at the conference to review exchange summarize and promote their achievements in the fields of industrial engineering and engineering management For example some experts pay special attention to the current state of the application of related techniques in China as well as their future prospects such as green product design quality control and management supply chain and logistics management to address the need for amongst other things low carbon energy saving and emission reduction They also offer opinions on the outlook for the development of related techniques The proceedings offers impressive methods and concrete applications for experts from colleges and universities research institutions and enterprises who are engaged in theoretical research into industrial engineering and engineering management and its applications As all the papers are of great value from both an academic and a practical point of view they also provide research data for international scholars who are investigating Chinese style enterprises and engineering management
