**Biblical Shalom for Sustainable Holistic Transformational Development in Nigeria** Stephen Z. Yashim, 2020-12-14 How do Christian organizations engaged in development work effectively facilitate the holistic transformation of communities In this important contribution to the field Dr Stephen Yashim reviews the participatory problem solving approaches commonly utilized by Christian relief and development organizations in Nigeria Dr Yashim highlights the failure of current methods to facilitate

dialogue between the biblical worldview with its divine transformative potential and the worldview of local rural communities. In order for rural communities to progressively experience biblical shalom, the total well-being of the whole and its members, they must be equipped to examine and articulate their own perspective on development while also engaging with biblical perspectives. Dr. Yashim proposes an alternative approach of participatory appreciative dialogue to be used alongside more traditional methods in pursuit of community transformation. This is an excellent resource for anyone engaged in community development and transformation and who longs to experience biblical shalom poured out among individuals and communities.

**Archaeological Method and Theory** Linda Ellis, 2003-12-16. This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications. It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research. Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials. Thus the reader will find entries on subject matter covering disciplinary theory, legislation affecting the work of archaeologists, pre-excavation surveying, excavation methodology, on-site conservation techniques, post-excavation analysis. The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources. Here the latest refinements in techniques such as radiometric dating, stable isotopic analysis, and the PCR technique of DNA analysis are presented clearly and authoritatively. The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences. Cultural property legislation, regardless of its country of origin, has affected how archaeologists conduct their work. This encyclopedia covers all major U.S. legislation developed for the protection of cultural property, including the recent Native American Graves Protection and Repatriation Act, and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology. Without some sort of conservation program at the point of excavation, valuable materials may be inadvertently contaminated or destroyed. Many simple and low-cost techniques to promote both sample integrity and long-term preservation for major classes of materials are described in this volume. Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range. This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology, Industrial Archaeology, Medieval Archaeology, and Classical Archaeology.

*The End of the World as We Know it* Immanuel Maurice Wallerstein, 1999. This book is nothing short of a state-of-the-world address delivered by a scholar uniquely suited to the task. Immanuel Wallerstein, one of the most prominent social scientists of our time, documents the profound transformations our world is undergoing. With these transformations, he argues, come equally profound changes in how we understand the world. Wallerstein begins his work with an appraisal of significant recent events: the collapse of the Leninist states, the exhaustion of

national liberation movements the rise of East Asia challenges to national sovereignty dangers to the environment debates about national identity and the marginalization of migrant populations Wallerstein places these events and trends in the context of the changing modern world system as a whole and identifies the historic choices they put before us The End of the World As We Know It concludes with a crucial analysis of the momentous intellectual challenges to social science as we know it today and suggests possible responses to them
