## Volume 2: Engineering Design and Applications

This fully revised and restructured new edition of the Industrial Ventilation Design Guidebook (IVDGB) brings together researchers, engineers (both design and plants), and scientists to develop a fundamental scientific understanding of ventilation. Now in two volumes, Volume 2: Engineering Design and Applications represents a significant advancement in the goal of global harmonization of engineering design.

### Key features

- Single reference source for design equations and methodology to develop control algorithms for automation (Industry 4.0) and to meet global challenges of climate change and a green economy
- Expanded section on experimental measurement techniques for process parameters in real time using state of the art sensors
- Expanded section on modeling techniques and its practical application based on recent advances in research
- New chapter on commissioning of conventional and complex ventilation systems
- New chapter prepared by global leaders on Best Practices for ventilation design for 11 different sectors including process and manufacturing industries, health care, and commercial kitchens

This is a valuable reference for consulting engineers as well as mechanical, process, and plant engineers working in the design of air pollution and ventilation systems based on sustainability for their industrial clients (processing and manufacturing) as well as health care applications for safe indoor environments for airborne viruses. Novel design methodology and advice on sensors and control algorithms for specialized ventilation are included.

**Howard Goodfellow** graduated with a PhD from the Department of Chemical Engineering and Applied Chemistry from the University of Toronto. He has spent his professional career in the private sector and has been responsible for specialized consulting and engineering design services for over 1000 global industrial and government clients in the environmental field. Dr. Goodfellow led an R&D team in Canada to build and commercialize award winning breakthrough online off gas measurement technology (Goodfellow EPSOP) for the steel industry.
