Our Bodies, Our Data Adam Tanner, 2017-01-10 How the hidden trade in our sensitive medical information became a multibillion dollar business but has done little to improve our health care outcomes Hidden to consumers patient medical data has become a multibillion dollar worldwide trade industry between our health care providers drug companies and a complex web of middlemen This great medical data bazaar sells copies of the prescription you recently filled your hospital records insurance claims blood test results and more stripped of your name but possibly with identifiers such as year of birth gender and doctor As computing grows ever more sophisticated patient dossiers become increasingly vulnerable to reidentification and the possibility of being targeted by identity thieves or hackers Paradoxically comprehensive electronic files for patient treatment the reason medical data exists in the first place remain an elusive goal Even today patients or their doctors rarely have easy access to comprehensive records that could improve care In the evolution of medical data the instinct for profit has outstripped patient needs This book tells the human behind the scenes story of how such a system evolved internationally It begins with New York advertising man Ludwig Wolfgang Frohlich who founded IMS Health the world s dominant health data miner in the 1950s IMS Health now gathers patient medical data from more than 45 billion transactions annually from 780 000 data feeds in more than 100 countries *Our Bodies Our Data* uncovers some of Frohlich s

hidden past and follows the story of what happened in the following decades This is both a story about medicine and medical practice and about big business and maximizing profits and the places these meet places most patients would like to believe are off limits Our Bodies Our Data seeks to spark debate on how we can best balance the promise big data offers to advance medicine and improve lives while preserving the rights and interests of every patient We the public deserve a say in this discussion After all it s our data
