INDUSTRIAL ECOLOGY - TERM PROJECT

A Design Project and Case Study

For the design project and case study, you are required to form teams of five students. Each group will select one of the following existing products:

- Office chair
- Desk telephone
- Bench
- Coffee maker
- Hand saw
- Vacuum domestic cleaner

and analyse its eco-efficiency using the knowledge and skills you will acquire during the course. The task comprises four key steps:

1. **Inventory:**
2. **Analysis of materials, energy and resources used to produce and produce use.**
3. **Problem-solving:**
4. **Suggestion for improvements of technical, user and eco performance.**

Because the term project involves real-world activities, students should expect that there will be gaps in information needed on their topic, and that the criteria used to make recommendations may be ambiguous. Teams are expected to take full account of the uncertainty of their recommendations by highlighting data gaps and the uncertainty of recommendations in assumptions. In actual practice, analyses which highlight gaps in information, identify critical assumptions, and place bounds around a possible answer are often just as useful as analyses which are able to provide clear-cut solutions. Consequently, teams will be evaluated on the thoroughness and creativity of their analyses and recommendations.

Design Project Milestone and Final Report Requirements

In a written report of 11 to 20 pages (A4 students), the report may be shorter and only needs to cover the subjects covered in class – single spaced, font size 12pt or Times New Roman minimum 11pt, figures and tables included, appropriate with one side, one inch margin, one and references are included in page number – each group of students presents answers to the case design questions relevant to their particular case study. Drawings may be hand drawn or computer generated, and should demonstrate good engineering practice. The report should include an abstract, introduction, product and component description, detailed list of assumptions, case design requirements and materials selection

Another popular platform for Project Management Sample Case Study Solved Example books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the

Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Project Management Sample Case Study Solved Example books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Project Management Sample Case Study Solved Example books and manuals for download and embark on your journey of knowledge?
