Classrooms with Diverse Learners Zachary Walker, Desiree Tan, Noi Keng Koh, 2020-06-29 This book addresses the background of classroom flipping explores the theoretical underpinnings for why flipping works and shares current success stories in practice It provides diverse international examples of classroom flipping for all ages includes discussions of the authors studies in the context of the existing research and illustrates the impact that classroom flipping has had across a range of educational settings instead of focusing on a specific domain or learner context Intended as a handbook for practitioners the analysis of commonly used highly effective techniques for learners of various ages fills a major gap in the literature It offers a valuable resource for educators helping them make the flipped learning experience an impactful and meaningful one *Deep Active Learning* Kayo Matsushita, 2017-09-12 This is the first book to connect the concepts of active learning and deep learning and to delineate theory and practice through collaboration between scholars in higher education from three countries Japan the United States and Sweden as well as different subject areas education psychology learning science teacher training dentistry and business It is only since the beginning of the twenty first century that active learning has become key to the shift from teaching to learning in Japanese higher education However active learning in Japan as in many other countries is just an umbrella term for teaching methods that promote students active participation such as group work discussions presentations and so on What is needed for students is not just active learning but deep active learning

Deep learning focuses on content and quality of learning whereas active learning especially in Japan focuses on methods of learning Deep active learning is placed at the intersection of active learning and deep learning referring to learning that engages students with the world as an object of learning while interacting with others and helps the students connect what they are learning with their previous knowledge and experiences as well as their future lives What curricula pedagogies assessments and learning environments facilitate such deep active learning This book attempts to respond to that question by linking theory with practice
