This article is very informative and incorporates vivid detail. The earlier the child is abused the greater chance they can heal earlier. This article primarily highlights the basic information, yet essential knowledge to fully comprehend physical childhood trauma and neglect. Every type of trauma leaves an individual with everlasting scars. As a child and throughout one's lifetime, the individual's sense of self is damaged, future relationships, and their ability to perform and function regularly. There is a big difference between parent's disciplining their child and physical abuse. Parents insist their actions are a form of discipline in order for their children to learn to behave. Parents who are physically abusive are unpredictable as the child never knows when the parents will lash out and assert control and use fear as a motive. In order to raise awareness, there are several warning signs to look out for. If the parents have a history of traumatic physical abuse as a child, these feelings can be repressed, but one can learn to break these habits. In order to help an abused or neglected child, there are many tips for talking to a child to provide reassurance and support for the child. It is vital for one to remain calm in this situation and do not interrogate the child as their safety is the priority.
