Liturgy in the Age of Reason Bryan D. Spinks,2008 Worship has always been affected by its surrounding culture This book examines the changing perspectives in and discussions on worship styles and practices from the Restoration to the death of Wesley in England and Scotland Moving beyond the text Spinks grounds the discussion within the changing cultural and intellectual framework of the period referred to as the Enlightenment The focus is the end of the early modern period when already the upheaval of the English Civil War the methods of the Cambridge Platonists and the thinking of Descartes and Spinoza were making the period one of transition and Newtonian thought and the thought of John Locke impacted theological thought and worship forms It is against this framework that the worship in England and Scotland will be described and assessed As well as published and unpublished liturgical documents this book draws on contemporary accounts and descriptions of worship catechisms sermons and theological works and contemporary diaries Musical and architectural changes are also noted particularly the late seventeenth century hymns of Richard Davies of Rothwell Joseph Stennett and Benjamin Keach This book places worship in the society which it served and from which changes sprang It explores the interaction of cultural thought and worship drawing parallels between the Enlightenment period and problems of late modernity and the worship wars of the late twentieth century *Catlin's Lament* John Hausdoerffer,2009 The first book to probe the conflicted attitudes that shaped and constrained noted painter George Catlin famous for his 19th century paintings of vanishing Native American culture Forces readers to rethink their understanding of the artist despite his advocacy for Native peoples **The Dawn of Astrology: The medieval and modern worlds** Nicholas Campion,2008

Infamy and Revolt Dean J. Kostantaras,2006 Historians have long speculated on the role played by the Enlightenment in the rise of nationalism in Eastern Europe and the Balkans The present volume offers a new perspective on this subject through an examination of the Greek Enlightenment its aspirations and its relationship to the larger European Republic of Letters Scholars of seventeenth and eighteenth century Europe will gain access in these pages to rare and in some cases never before translated works from the time period works that offer fresh and far reaching insights into the nature origin and

development of nationalist movements **Women as Australian Citizens** Patricia M. Crawford, Philippa C. Maddern, 2001
What does it mean to be a woman citizen in Australia today Why have Australian women appeared so rarely in public political life despite gaining the vote in 1901 Why has formal citizenship historically been analysed in primarily male terms And how have women themselves established different practices of citizenship from those of men **Women as Australian Citizens** addresses these questions It examines the long histories of citizenship for Australian women of various ethnic and cultural backgrounds showing how gender far from being irrelevant has been central to constructions of the concept of citizenship Hence citizenship has been masculinised and women s citizenly activities marginalised This challenging and original work problematises the concept of citizenship and the unstated assumptions infusing it The authors argue that from its earliest European origins the word citizen has acted as a term of division denoting both inclusion in and exclusion from civic power and initiating enduring negotiations over the criteria for becoming a citizen Patricia Crawford Philippa Maddern and their associate authors investigate how gender has been used as a marker and justification for inclusion and exclusion They show how women from many different backgrounds from the medieval world onwards rethought and rewrote their own citizenship and argue that the legacies of these historical debates still underlie community understandings of modern Australian citizenship **What Was the Oxford Movement?** George Herring, 2002 This account of the Oxford or Tractarian movement provides essential information to the study of English church history and the history of England during the Victorian era This book is an up to date scholarly but approachable exploration of the Movement which features primary material from a range of its key members Herring looks at the relationship between the Movement and the older pre 1833 High Church tradition and crucially at developments after Newman s departure for Rome in 1845 By placing the Tractarians in the general political and social context of Victorian movements that sought to revitalize England s traditional institutions during a period of urbanization and industrialization Herring brings new meaning to the movement French Colonial History ,2003 Explorations in Early American Culture ,1999 **The American Journal of Islamic Social Sciences** ,2005
