New Analysis and Modeling Directions in Social Interaction Science Sophie C. F. Hendrikse, Jan Treur, Sander L. Koole, 2026-01-01 There is much scientific literature

on multimodal social interaction between human and or virtual agents and related multimodal synchrony analysis and behavioural adaptivity within the interaction such as affiliation and bonding However due to its strongly cyclical character complexity and adaptivity mathematical formalisation and computational simulation of it is a nontrivial topic Moreover the subjective agent oriented perspective on synchrony analysis has not yet received much attention in the literature This book provides from an agent oriented perspective an overview of recent work on mathematical formalisation and computational simulation of multimodal interaction subjective multimodal synchrony analysis and related behavioural adaptivity underlying for example affiliation liking and bonding It does so by exploiting the possibilities of multi time scale multi adaptive multi level self modeling network models for agents to analyse and model these dynamic and adaptive processes formally In this way it contributes to the development of a solid basis for social interaction science

Moral Issues in Military Decision Making Anthony E. Hartle, 2004 Much has changed in warfare in recent years with America now dominant on the international scene and terrorism the new enemy In light of these changes the need for moral grounding in military actions is a more pressing concern than ever When it was originally published **Moral Issues in Military Decision Making** reflected the concerns posed by nuclear stalemate and the lessons of Vietnam In that highly praised work Anthony Hartle outlined the essential elements of the Professional Military Ethic created for American military forces In this new edition he reexamines the moral foundations

for America's military leadership in the post 9/11 era. Considering world affairs since the first edition, the Gulf War, Bosnia, Afghanistan, Iraq, 9/11, and the emergence of the United States as an unrivaled military power, Hartle explains how these events have raised ethical issues that differ dramatically from those of the Cold War, by the war on terrorism, homeland defense, asymmetric warfare, the proliferation of American military interventions, and the UN's role in peacekeeping operations. Using meticulously analyzed case studies, twice as many as in the first edition, he considers such moral dilemmas as torture, challenging superior officers, use of overwhelming force, and responding to fire in the presence of civilian shields. In this revision, Hartle examines further the status of professional military ethics in light of current affairs, changes in the articulation of military values, and recent research. In a new chapter on human rights, he relates moral principles directly to values embedded in the Constitution and argues that overwhelming American military power cannot succeed unless it is accompanied by the moral force of the values it seeks to protect. Difficulties of applying conventional laws of war and human rights doctrine in military operations, Hartle convincingly shows that national security is as much about the preservation of moral principles as it is about the protection of America's citizens and borders. His book demonstrates that the American military must continue to observe those principles in order to be effective in its primary mission.
