International Books in Print ,1986 *Subject Guide to Books in Print* ,1997 **Cases in Chemical Pathology** R. N. Walmsley, L. R. Watkinson, H. J. Cain, 1999 This book is the fourth edition of a highly regarded text which was first published in 1988 It introduces the reader to the interpretation of routine laboratory biochemical test results and covers all aspects of interpretative chemical pathology including reproductive endocrinology which was not covered previously The approach is based on case material from the authors laboratory and employs algorithms and similar aids for interpretation The material is structured so that it is comprehensible to beginners as well as being useful for the more experienced practitioners The envisaged audience is medical undergraduates general practitioners clinical biochemists and laboratory technicians

A Primer of Chemical Pathology E. S. C. Koay, Noel Walmsley, 1996 This book has been written primarily for medical students and junior doctors in clinical practice but would also be a useful reference for postgraduate students in chemical pathology clinical biochemistry laboratory scientists pathologists and medical laboratory technologists It covers the field of chemical pathology the biochemical basis of disease and provides a basic understanding of the relationship between abnormal biochemical test results and disease states A rational approach to proper selection and interpretation of biochemical investigations is adopted for each organ system or analyte covered in the 28 chapters Emphasis is placed on areas and problems most commonly met with in clinical practice Meant primarily as an introductory study book to the subject rather than as a reference text the materials have been presented in a clear condensed format to aid the study process The written text is amply supplemented with relevant illustrations

Cases In Chemical Pathology: A Diagnostic Approach (Third Edition) Noel Walmsley, Les R Watkinson, Evelyn S C Koay, 1992-10-28 This book deals with the clinical aspects and interpretation of test results of disorders commonly encountered by clinicians and the chemical pathology laboratory It is

structured around actual case material seen in the author's laboratory and emphasizes the selection of tests and interpretation of results. Each of the 25 chapters deals with a single analyte or a single organ system and includes case material, discussion of evaluation of the particular disorder and interpretation of test results. The content is non-specialised enough to be followed by general practitioners but sufficiently detailed to appeal to the more specialised practitioner. It will be particularly useful to medical students who first embark on a study of this subject, the clinical biochemists at the bench and students preparing for College examinations such as those for physicians, pathologists and surgeons.
