Trees and Timber in the Anglo-Saxon World Michael D. J. Bintley, Michael G. Shapland, 2013-10 Trees were of fundamental importance in Anglo Saxon society Anglo Saxons dwelt in timber houses relied on woodland as an economic resource and created a material culture of wood which was at least as meaningfully imbued and vastly more prevalent than the sculpture and metalwork with which we associate them today Trees held a central place in Anglo Saxon belief systems which carried into the Christian period not least in the figure of the cross itself Despite this the transience of trees and timber in comparison to metal and stone has meant that the subject has received comparatively little attention from scholars *Trees and Timber in the Anglo Saxon World* constitutes the very first collection of essays written about the role of trees in early medieval England bringing together established specialists and new voices to present an interdisciplinary insight into the complex relationship between the early English and their woodlands The woodlands of England were not only deeply rooted in every aspect of Anglo Saxon material culture as a source of heat and light food and drink wood and timber for the construction of tools weapons and materials but also in their spiritual life symbolic vocabulary and sense of connection to their beliefs and heritage These essays do not merely focus on practicalities such as carpentry techniques and the extent of woodland coverage but rather explore the place of trees and timber in the intellectual lives of the early medieval inhabitants of England using evidence from archaeology place names landscapes and written sources

Language Education in a Changing World Rod Bolitho, Richard Rossner, 2020-03-04 This book considers the importance of language education in a rapidly changing world The authors look at language education from different perspectives the teaching and learning of foreign or second languages the role of literacy oracy and language across the curriculum the part played by different stakeholders in educational policy and the current state of language teacher

education and the ways in which language is addressed in the education of teachers of all subjects Drawing on their extensive experience of language education and on case studies and data from around the world the authors consider how a different approach to language in education might help students to develop the language awareness and linguistic and communicative competences they need in order to participate fully and confidently in our increasingly diverse societies Chapter 1 and Chapter 10 are free to download as open access publications under a CC BY NC ND licence You can access them here Chapter 1 The Crucial Role of Language in Education <https://zenodo.org/record/8282422> Chapter 10 Language in Education and in Teacher Education Towards New Paradigms <https://zenodo.org/record/8282728>

Assessing Language Teachers' Professional Skills and Knowledge Rosemary Wilson, Monica Poulter, 2015-01-31 The growth in English language teaching worldwide and the related increase in teacher training programmes of all kinds highlight the need for greater accountability in the assessment of teachers The need for formal summative assessment has taken on greater importance in training programmes and requires procedures which do not always sit easily with the development process while transparency of assessment procedures is also increasingly demanded by the candidates themselves This edited volume discusses key issues in assessing language teachers professional skills and knowledge and provides case study illustrations of how teacher knowledge and teaching skills are assessed at pre service and in service levels within the framework of the Cambridge English Teaching Qualifications The volume provides discussion of ways in which the changing nature of English language teaching has impacted on teacher education and assessment examples of specific assessment procedures for both teaching knowledge and practical classroom skills accounts of the ways in which the Cambridge English Teaching Qualifications have been integrated into and adapted for local contexts This is the first volume of its kind wholly dedicated to language teacher assessment and as such will be of interest to language teachers and teacher educators as well as to researchers and postgraduate students
