**Real and Functional Analysis** Vladimir I. Bogachev, Oleg G. Smolyanov, 2020-02-25 This book is based on lectures given at Mekhmat the Department of Mechanics and Mathematics at Moscow State University one of the top mathematical departments worldwide with a rich tradition of teaching functional analysis Featuring an advanced course on real and functional analysis the book presents not only core material traditionally included in university courses of different levels but also a survey of the most important results of a more subtle nature which cannot be considered basic but which are useful for applications Further it includes several hundred exercises of varying difficulty with tips and references The book is intended for graduate and PhD students studying real and functional analysis as well as mathematicians and physicists whose research is related to functional analysis

**Classes of Linear Operators Vol. I** Israel Gohberg, Seymour Goldberg, Marinus Kaashoek, 1990-10-01 After the book Basic Operator Theory by Gohberg Goldberg was published we that is the present authors intended to continue with another book which would show the readers the large variety of classes of operators and the important role they play in applications The book was planned to be of modest size but due to the profusion of results in this area of analysis the number of topics grew larger than expected Consequently we decided to divide the material into two volumes the first volume being presented now During the past years courses and seminars were given at our respective institutions based on parts of the texts These were well received by the audience and enabled us to make appropriate choices for the topics and presentation for the two volumes We would like to thank G J Groenewald A B Kuijper and A C M Ran of the Vrije Universiteit at Amsterdam who provided us with lists of remarks and corrections We are now aware that the Basic Operator Theory book should be revised so that it may suitably fit in with our present volumes This revision is planned to be the last step of an induction and not the first
