in modernization and that's the true balance we talk about. Even though they have great technologies they still walk the entire day to live longer. They eat boiled vegetables, beans, and drink flowers green tea, but this is just a simple surface level outlook to look at the Japanese culture as if you go to Japan and observe closely everything is perfectly placed. Even with a huge population of 123 million they have maintained a great level of discipline and believe me they show their culture in a socialist form, sometimes ignoring the individual needs but without individualism socialism can't survive for too long. When the humans on this planet continuously seek how they can live longer they brilliantly understood the quality along with the longevity of their lives but Japanese culture and their secrets to attain the clock of nature and longevity is much deeper than anything Japan. The Clock of Nature and Longevity will go extremely deep to know the individual and social culture to understand how Japan is thriving better than most countries in the world and even with nature they are so modernized which is a perfect blend of balancing life and we feel that needs to be studied deeply. We have done deep research to understand how Japanese people are living longer and how we can learn those techniques and methods individually and socially to improve our lives spontaneously at every level.
