Chemistry Carla Mooney, 2016-05-16 Have you ever wondered what makes up everything in the world around you Or what exactly is the

difference between solids liquids and gases Have you wanted to know what causes two substances to react or change Chemistry Investigate the Matter that Makes Up Your World introduces readers 12 through 15 to the fascinating world of protons neutrons and electrons Learn how these molecules combine to form ordinary objects such as the chair you re sitting on the water in your glass even you Through hands on investigative projects readers delve into the world of chemical reactions and changing matter learning how these principles are used in many areas of science from biochemistry to nuclear science Combining hands on science inquiry with chemistry mathematics and biology projects include building models of molecules and bonds identifying acids and bases investigating the effect of temperature on reaction rate and observing how a chemical reaction from vinegar water and bleach can accelerate the rusting of steel Chemistry offers entertaining illustrations and fascinating sidebars to illuminate the topic and engage readers further plus integrates a digital learning component by providing links to primary sources videos and other relevant websites [Teaching Secondary Science](#) Geoff Woolcott,Robert Whannell,2017-11-16 Teaching Secondary Science Theory and Practice provides a dynamic approach to preparing preservice science teachers for practice Divided into two parts theory and practice the text allows students to first become confident in the theory of teaching science before showing how this theory can be applied to practice through ideas for implementation such as sample lesson plans These examples span a variety of age levels and subject areas allowing preservice teachers to adapt each exercise to suit their needs when they enter the classroom Each chapter is supported by pedagogical features including learning objectives reflections scenarios key terms questions research topics and further readings Written by leading science education researchers from universities across Australia Teaching Secondary Science is a practical resource that will continue to inspire preservice teachers as they move from study into the classroom This book includes a single use twelve month subscription to Cambridge Dynamic Science [Creating the Global Classroom](#) Laurence Peters,2022-03-10 The book examines how to begin to think like a global educator first by examining how our own histories and experiences have formed our own cultural and professional identities and second how the varied frames by which global education can be understood pedagogical ideological and cosmopolitan have shaped the field Laurence Peters connects theory and practice about global education relevant to cultivating global awareness in primary and secondary students Rather than seeing global education as a special field separate from the other disciplines the author encourages integration of global perspectives into everything we do Showcasing how global awareness is a developmental issue dependent upon the student s ability to step outside of their own place based comfort zone this volume lays out a roadmap of major challenges and issues around instilling this awareness in students This book connects theory and practice about global education relevant to cultivating global awareness in primary and secondary students From this foundation the book engages with the challenge of integrating global perspectives within a crowded curriculum By convincing students and teachers alike of global education s centrality thinking globally becomes an integral component of learning across subject areas and grade levels and

this work encourages students to exercise empathy for the other and to develop critical skills to see through media distortions and fake news so they can better resist the tendency of politicians in our increasingly multicultural countries to divide people along racial and ethnic lines
