Managerial Accounting Irvin N. Gleim, Terry L. Campbell, 1988 *Workbook/Study Guide for Use with Managerial Accounting, 6th Canadian Edition* Michael Hockenstein, 2004 *Introduction to Management Accounting* Charles T. Horngren, 2001-08 Offering a relevant real world decision making approach to management accounting this text develops a solid understanding of costs and cost behaviour and the use of cost information for planning and control decisions not just inventory valuation CIMA Official Learning System Test of Professional Competence in Management Accounting Nick Best, Kaplan Higher Education, 2009-07-18 CIMA Official Learning Systems are the only textbooks recommended by CIMA as core reading Written by the CIMA examiners markers and lecturers they specifically prepare students to pass the CIMA exams first time Fully updated to reflect the 2010 syllabus they are crammed with features to reinforce learning including step by step coverage directly linked to CIMA s learning outcomes fully revised examples and case studies extensive question practice to test knowledge and understanding integrated readings to increase understanding of key theory colour used throughout to aid navigation The Official Learning systems are the only study materials endorsed by CIMA Key sections written by former examiners for the most accurate up to date guidance towards exam success Complete integrated package incorporating syllabus guidance full text recommended articles revision guides and extensive question practice Heuristic Reasoning in Management Accounting Jörn Sebastian Basel, Jörn Basel, 2012 Heuristics are short cuts and deliberately ignore information for instance through examining fewer cues or integrating less information However this collides with a view on management accountants and controllers as rational agents which seems to suggest that all available information should be considered As their role as information supplier is often accompanied with the task to assist managers in their judgment and decision making they have huge influence on these processes Therefore it is of high relevance to know if how and which heuristics management accountants and controllers use Furthermore we need to know which individual and situational factors influence their usage of heuristics With a series of five empirical studies applying a mixed methods research design the author sheds light to these research questions and addresses some central claims of the potential biases but also the stunning benefits of relying on heuristic reasoning Central to his discussion are dual process approaches which are debated in cognitive psychology Scholars of these approaches claim that we should distinguish between two distinct processes or systems of the human mind Following this interpretation heuristics are processes which are described as intuitive automatic fast and unconscious They are routinized cognitive processes which are based on experience in certain social environments and thus often exhibit ecological rationality Overall this book picks up an up to date topic in behavioural accounting research which not only is of relevance for researchers but as well for practitioners **Managerial Accounting** Geraldine F.
