Authenticity, sustainability, and independence as a branding strategy for selling fermented functional food and beverage Nika Jere, 2021-09-23 Bachelor Thesis from the year 2021 in the subject Business economics Offline Marketing and Online Marketing grade 1 00 course Intercultural Management language English abstract The purpose of this paper is to examine how privately owned European SMEs are using authenticity sustainability and independence as part of their branding strategy for selling fermented functional food and beverage The paper discusses possible promising target groups and gaps in the market by using the Sinus Milieus and Braunegger s models A literature review of the authenticity sustainability and independence concepts is followed by an in depth analysis of eight SMEs which illustrates how these concepts are being communicated by existent entities The findings show that start ups in the fermented food and drink industry tend to use phrases and visual materials that can be categorized in five areas of authenticity while primarily focusing on one to two areas It was noticed that 75 percent of analysed SMEs use their website to communicate their sustainability principles Moreover the examples exhibit the widespread use of glass and recyclable hemp as packaging materials In addition green delivery and CO2 emission off setting were found to play a significant role in today s sustainable SMEs In the section on independence the author hypothesizes the increasing importance of independence in the food and beverage business Concludingly the paper aims to assist companies to find their place in the market especially while competing with mainstream brands and large corporations With the help of this toolset these privately owned enterprises will be able to spend more time producing healthy desired products while creating significant added value that directly contributes to the EU economy

Elementary Food Science Richard Owusu-Apenten, Ernest R. Vieira, 2022-05-28 Following the success of the popular introductory text *Elementary Food Science* 5th edition covers a broad range of food science topics organized in four parts Part 1 Interrelated food science topics Part 2 Food safety GMP is described independently and as a prerequisite for HACCP VACCP and TACCP food safety management systems Part 3 contains two new chapters dealing with basic aspects of food processing and the quality of dried foods Part 4 covers handling and processing major food commodity groups meat dairy products poultry and eggs fish and shellfish cereal grains bakery products fruits and vegetables sugar confectionary A new final chapter covers the foodservice industry The text highlights food science links with industry uniquely using the North American Industry Classification System NAICS Overall the book is thoroughly modernized with over 1500 references cited in recognition of thousands of named food scientists and other professionals The target readership remain unchanged for the current edition i e Students of food science from senior high school colleges or universities Sections of the book will also appeal to advanced readers from other disciplines with perhaps little or no prior food science experience Additionally readers covering the intersection of food science with culinary arts foodservices and nutrition or public health will find the book useful
