Computing and Social Media SCSM 2025 held as part of the 27th HCI International Conference HCII 2025 which took place in Gothenburg Sweden during June 22-27 2025. A total of 1430 papers and 355 posters included in the HCII 2025 proceedings was carefully reviewed and selected from 7972 submissions. The SCSM 2025 proceedings were organized in the following topical sections: Designing and Developing Social Interactions, Social Media in Learning and Education, Supporting Communication and Psychological Well Being, User Behavior and Experience in Social Media, and AI and Social Network Analysis.

**AI Applications in Online Higher Education Administration** Kathleen S. Ives, Marie Cini, Ray Schroeder, 2026-03-09. AI is reshaping higher education fast. This book brings together faculty, instructional designers, technologists, and academic leaders who are on the front lines of that change. Their chapters offer honest reflections, practical examples, and thoughtful perspectives on how AI is influencing course design, assessment, student support, policy, and leadership. Rather than hype or fear, the contributors offer grounded insight into what it takes to integrate AI in ways that are ethical, equitable, and truly student-centered. They explore both opportunities and risks with an eye toward long-term impact, not just short-term solutions. Whether you're charting an institutional AI strategy or simply trying to understand what's ahead, this collection is a timely guide. It doesn't treat AI as a magic fix, but as a tool, one that when used wisely can help higher education become more human, not less.

AI-Powered Pedagogy, Academic Transformation, and Faculty Empowerment Abdelaal, Reda Mohamed Said, Kayyali, Mustafa, 2026-02-11. Artificial intelligence (AI) is rapidly reshaping the landscape of education, ushering in new possibilities for teaching and learning. AI-powered pedagogy transforms how knowledge is delivered, enabling personalized learning experiences. As institutions adapt to these innovations, faculty members are no longer passive recipients of technology but active agents in integrating AI to enhance curriculum design and scholarly productivity. AI-Powered Pedagogy, Academic Transformation, and Faculty Empowerment explores the urgent need for higher education to adapt to the rise of AI and machine learning (ML). It examines how innovative curricula from diverse institutions have integrated AI and machine learning into their programs. Covering topics such as AI curriculum design and pedagogy, this book is an excellent resource for educational institutions, academicians, researchers, technology developers, curriculum developers, and graduate students.

Leaders as Architects of Change Sharon M. Ravitch, Raghu Krishnamoorthy, 2026-03-17. Leaders as Architects of Change provides new approaches, frames, and tools for leaders and their teams to design, drive, and support cultures of workplace inquiry, which create collective capacity and adaptivity and which ground and connect people in times of change. Written by scholar-practitioners alongside global business leaders, the book explores how organizations can thrive in a brittle, anxious, nonlinear, and incomprehensible (BANI) world. Drawing on evidence-based research and real-world experience, the contributors present practical frameworks for antifragility, emotional intelligence, adaptive culture, and collaborative leadership. Through chapters on AI-driven disruption, organizational resilience, dissent by design, and trust in virtual teams, the book reveals how leaders can design adaptive systems that bend without breaking, cultivate psychological

safety and unlock human flourishing Rather than offering prescriptive fixes it provides tools to architect conditions for resilience innovation and belonging The book will resonate with executives academics consultants and students of leadership who seek actionable strategies to navigate volatility Readers will gain both insight and courage to reimagine organizations not as machines of control but as living systems of connection adaptability and purpose

**Proceedings of the 5th International Conference on AI Research** Renata Paola Dameri, The International Conference on AI Research ICAIR is becoming a key forum for academics and students whether social scientists natural scientists or philosophers come together to explore the future of society in the context of AI Many aspects of AI are now the subject of peer reviewed academic research including the increasing use of Chatbots and GenAI in academe and in society at large The conference was initially launched in 2019 as the European Conference on Artificial Intelligence and Robotics After a success inaugural event in Oxford the conference fell victim to Covid and the following three years were held online Time was taken in 2023 to refocus this fast developing area of research and the name of the conference was changed this year to the International Conference on Artificial Intelligence The Proceedings of the 2025 edition of the conference include academic research papers PhD research papers Masters Research papers and work in progress papers all of which have been presented and discussed at the ICAIR 2025 conference The proceedings are of an academic level appropriate to a professional research audience including graduates postgraduations doctoral and post doctoral researchers All papers have been double blind peer reviewed by members of the Review Committee
