

Preface

I am pleased to present my project on **Computing PI value** as part of the

Informatics Practices curriculum. This project focuses on writing programs using Python and the Pandas library, which is a powerful

tool for data manipulation and analysis. The aim of this project is to

explore the functionality of Pandas and implement real-world data

analysis problems.

The journey of completing this project has been a rewarding experience, allowing me to deepen my understanding of programming

concepts and develop problem-solving skills. I chose this topic to

enhance my knowledge of Python, and I believe it will serve as a

foundation for future programming endeavours.

I hope this project serves as a helpful guide to others who wish to

explore the world of Python and Pandas.
