Bad Breaks in Real GDP and Employment Harrison C. Hartman, 2024-05-31 Why do policymakers allow economies to settle into a new normal after a bad break in the economy rather than try to return the economy to its previous trend In this book economist Harrison C Hartman discusses some of the variables that impact a nation s ability to recover from negative aggregate demand shocks Spanning total real GDP per capita real GDP and nonfarm payroll employment in the USA the book emphasizes the role of aggregate demand shocks in causing the US economy to fail to return to trend The resulting book challenges modern mainstream macroeconomic theories and highlights the complexities of post recession recovery The chapters provide econometric evidence both for and against the impact of aggregate demand on real GDP and employment levels in the long run Hartman studies modern macroeconomic theories related to economic resilience and demand using a the velocity of money and the equation of exchange and b econometric analysis to dissect modern macroeconomic theories related to economic resilience and demand The book provides methods to estimate and evaluate trends and after simple methods for estimating trend and discussing associated results the book turns attention to model selection hypothesis testing and further results This book also offers some possible areas for future work A thought provoking exploration of economic recovery or lack thereof the book covers aggregate demand employment real GDP and economic theories classical Keynesian monetarist neoclassical new Keynesian and post Keynesian perspectives *Bad Breaks in Real GDP and Employment* is a timely and essential guide for economists navigating

Finance and the Behavioral Prospect James Ming Chen,2016-10-01 This book explains how investor behavior from mental accounting to the combustible interplay of hope and fear affects financial economics The transformation of portfolio theory begins with the identification of anomalies Gaps in perception and behavioral departures from rationality spur momentum irrational exuberance and speculative bubbles Behavioral accounting undermines the rational premises of mathematical finance Assets and portfolios are imbued with affect Positive and negative emotions warp investment decisions Whether hedging against intertemporal changes in their ability to bear risk or climbing a psychological hierarchy of needs investors arrange their portfolios and financial affairs according to emotions and perceptions Risk aversion and life cycle theories of consumption provide possible solutions to the equity premium puzzle an iconic financial mystery Prospect theory has questioned the cogency of the efficient capital markets hypothesis Behavioral portfolio theory arises from a psychological account of security potential and aspiration *Subject Guide to Books in Print* ,1996 *The Idea of History in Constructing Economics* Michael H. Turk,2015-08-11 How scientific is economics This question has often been framed by analogies and correspondences made between economics and other seemingly more well established scientific disciplines starting with classical mechanics At the same time economics is likely to be seen in opposition to or in contrast with history where the reliance upon generalizing rules thought experiments and model construction in economics is set against the amassing of particular facts intended to create narratives in history In this new volume Turk explores the relationship between economics and history including the often fraught one between economics and economic history making the case that economics does in fact require the proper grounding in history that has so often been ignored This work challenges the attempt to link economics with other more clearly scientific disciplines as flawed and fundamentally wrongheaded A key element of this book is its examination of the gaps and associations that exist in or are seen through linkages with thermodynamics classical mechanics biology literature mathematics philosophy and sociology This exploration is frequently undertaken through study of the work of one or more major figures in the history of economic thought ranging from Quesnay and Smith through Walras and Max Weber to Robinson Krugman David and Arthur Through the possibility of an alternative to the gaps noted in each such comparison the underlying necessary connection between economics and history can be brought out The book concludes by exploring the basis for the positive construction of a historical economics This book is suited for those who
