Trends in Functional Programming Michał Pałka,Magnus Myreen,2019-04-23 This book constitutes the thoroughly refereed revised selected papers of the 19th International Symposium on Trends in Functional Programming TFP 2018 held in Gothenburg Sweden in June 2018 The 7 revised full papers were selected from 13 submissions and present papers in all aspects of functional programming taking a broad view of current and future trends in the area It aspires to be a lively environment for presenting the latest research results and other contributions described in draft papers submitted prior to the symposium

Type-Driven Development with Idris Edwin Brady,2017-03-13 Summary Type Driven Development with Idris written by the creator of Idris teaches you how to improve the performance and accuracy of your programs by taking advantage of a state of the art type system This book teaches you with Idris a language designed to support type driven development Purchase of the print book includes a free eBook in PDF Kindle and ePub formats from Manning Publications About the Technology Stop fighting type errors Type driven development is an approach to coding that embraces types as the foundation of your code essentially as built in documentation your compiler can use to check data relationships and other assumptions With this approach you can define specifications early in development and write code that s easy to maintain test and extend Idris is a Haskell like language with first class dependent types that s perfect for learning type driven programming techniques you can apply in any codebase About the Book Type Driven Development with Idris teaches you how to improve the performance and accuracy of your code by taking advantage of a state of the art type system In this book you ll learn type driven development of real world software as well as how to handle side effects interaction state and concurrency By the end you ll be able to develop robust and verified software in Idris and apply type driven development methods to other languages What s Inside Understanding dependent types Types as first class language constructs Types as a guide to program construction Expressing relationships between data About the Reader Written for programmers with knowledge of functional programming concepts About the Author Edwin Brady leads the design and implementation of the Idris language Table of Contents PART 1 INTRODUCTION Overview Getting started with IdrisPART 2 CORE IDRIS Interactive development with types User defined data types Interactive programs input and output processing Programming with first class types Interfaces using constrained generic types Equality expressing relationships between data Predicates expressing assumptions and contracts in types Views extending pattern matching PART 3 IDRIS AND THE REAL WORLD Streams and processes working with infinite data Writing programs with state State machines verifying protocols in types Dependent state machines handling feedback and errors Type safe concurrent programming

Practical Aspects of Declarative Languages Bharat Jayaraman,2004-06-14 This book constitutes the refereed proceedings of the 6th International Symposium on Practical Aspects of Declarative Languages

PADL 2004 held in Dallas Texas USA in June 2004 The 15 revised full papers presented together with 2 invited papers were carefully reviewed and selected for presentation All current aspects of declarative programming are addressed

Mathematics of Program Construction Dexter Kozen, Carron Shankland, 2004-09-21 This volume contains the proceedings of MPC 2004 the Seventh International Conference on the Mathematics of Program Construction This series of conferences aims to promote the development of mathematical principles and techniques that are demonstrably useful in the process of constructing computer programs whether implemented in hardware or software The focus is on techniques that combine precision with conciseness enabling programs to be constructed by formal calculation Within this theme the scope of the series is very diverse including programming methodology program specification and transformation programming paradigms programming calculi and programming language semantics The quality of the papers submitted to the conference was in general very high and the number of submissions was comparable to that for the previous conference Each paper was refereed by at least four and often more committee members This volume contains 19 papers selected for presentation by the program committee from 37 submissions as well as the abstract of one invited talk titled Static Checking for Java by Greg Nelson Imaging Systems Department HP Labs Palo Alto California The conference took place in Stirling Scotland The previous six conferences were held in 1989 in Twente The Netherlands in 1992 in Oxford UK in 1995 in Kloster Irsee Germany in 1998 in Marstrand near Göteborg Sweden in 2000 in Ponte de Lima Portugal and in 2002 in Dagstuhl Germany The proceedings of these conferences were published as LNCS 375 669 947 1422 1837 and 2386 respectively Programming
