Loose Leaf for Project Management: The Managerial Process Erik W. Larson,Clifford F. Gray,2020-01-02 Project Management 8e provides a holistic and realistic

approach to Project Management that combines the human aspect and culture of an organization with the tools and methods used. It covers concepts and skills used to propose plan, secure resources, budget and lead project teams to successful completion of projects. This text is not only on how the management process works but also and more importantly on why it works. It is not intended to specialize by industry type or project scope rather it is written for the individual who will be required to manage a variety of projects in a variety of organizational settings. It was written for a broad range of audiences including project managers, students, analysts and Project Management Institute Members preparing for certification exams. The digital component Connect now has enhanced algorithmic problems, Application Based Activities, SmartBook 2.0 and Practice Operations, a game based 3D operations management simulation.

Project Management: The Managerial Process with MS Project Erik W. Larson, Clifford F. Gray, 2013-10-16. As the market leading textbook on the subject, Project Management: The Managerial Process is distinguished by its balanced treatment of both the technical and behavioral issues in project management as well as by its coverage of a broad range of industries to which project management principles can be applied. It focuses on how project management is integral to the organization as a whole. The text not only delivers the tools and processes essential to successful project management but also an understanding that the effectiveness of these tools and methods are shaped and determined by the prevailing culture of the organization and interpersonal dynamics of the people involved. As such, Larson Gray presents a holistic view that focuses on methodology as well as the human dimension and how they interact to determine the outcome of projects. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need when they need it and how they need it so that your class time is more engaging and effective.

Quantitative Business Modeling Jack R. Meredith, Scott M. Shafer, Efraim Turban, 2002. Rather than giving instruction in models and solving problems, this textbook focuses on the process of modeling and the use of models in analyzing various managerial situations. The process of modeling is highly relevant to all business disciplines and is a critical skill for all professionals. The emphasis of this text will be on the integration and development of modeling skills including problem recognition, data collection, model formulation, analysis and communicating and implementing the results.

Decision Technology Matthew Liberatore, Robert Nydick, 2003. The authors use Lingo, Expert Choice, Extend and MS Project 2000 to introduce decision technology. This offers a flexible approach to math programming formulations.
