Periodico di
matematiche, 1896 **Mathematical Correspondences and Critical Editions** Maria Teresa Borgato, Erwin
Neuenschwander, Irène Passeron, 2019-03-22 Mathematical correspondence offers a rich heritage for the history of
mathematics and science as well as cultural history and other areas It naturally covers a vast range of topics and not only of
a scientific nature it includes letters between mathematicians but also between mathematicians and politicians publishers
and men or women of culture Wallis Leibniz the Bernoullis D Alembert Condorcet Lagrange Gauss Hermite Betti Cremona
Poincar and van der Waerden are undoubtedly authors of great interest and their letters are valuable documents but the
correspondence of less well known authors too can often make an equally important contribution to our understanding of
developments in the history of science Mathematical correspondences also play an important role in the editions of collected
works contributing to the reconstruction of scientific biographies as well as the genesis of scientific ideas and in the correct
dating and interpretation of scientific writings This volume is based on the symposium Mathematical Correspondences and
Critical Editions held at the 6th International Conference of the ESHS in Lisbon Portugal in 2014 In the context of the more
than fifteen major and minor editions of mathematical correspondences and collected works presented in detail the volume
discusses issues such as History and prospects of past and ongoing edition projects Critical aspects of past editions The
complementary role of printed and digital editions Integral and partial editions of correspondence Reproduction techniques
for manuscripts images and formulae and the editorial challenges and opportunities presented by digital technology
