Calculus For The Ambitious:

Calculus for the Ambitious T. W. Körner, 2014-05-29 From the author of *The Pleasures of Counting* and *Na ve Decision Making* comes a calculus book perfect for self study It will open up the ideas of the calculus for any 16 to 18 year old about to begin studies in mathematics and will be useful for anyone who would like to see a different account of the calculus from that given in the standard texts In a lively and easy to read style Professor Körner uses approximation and estimates in a way that will easily merge into the standard development of analysis By using Taylor's theorem with error bounds he is able to discuss topics that are rarely covered at this introductory level This book describes important and interesting ideas in a way that will enthuse a new generation of mathematicians **Page's Engineering Weekly**, 1904 **For the Learning of**

Mathematics, 1999 *Louis Couturat -Traité de Logique algorithmique* Oliver Schlaudt, Mohsen Sakhri, 2010-06-02 Louis Couturat 1868-1914 was an outstanding intellectual of the turn of the nineteenth to the twentieth century He is known for his work in the philosophy of mathematics for his critical and editorial work on Leibniz for his attempt to popularise modern logic in France for his commitment to an international auxiliary language as well as for his extended correspondence with scholars and mathematicians from Great Britain the United States Italy and Germany From his correspondence we know of four unpublished manuscripts on logic and its history which were largely complete and some of which must have been of considerable size We publish here for the first time in a critical edition the only one of these manuscripts that has been rediscovered the *Traité de Logique algorithmique* presumably written in the years 1899-1901 It is a highly interesting document of the academic reception and popularisation of symbolic logic in France It provides evidence of the discussions and controversies which accompanied the creation of logic as a new branch of science At the same time it completes the picture of Couturat's work which has been opened up to systematic study by the publication of important parts of his correspondence during the last decade We append the article on Symbolic Logic of 1902 which Couturat wrote in collaboration with Christine Ladd Franklin for Baldwin's *Dictionary of Philosophy and Psychology* **Constitutional**

Economics and Public Institutions Francisco Cabrillo, 2013 This extensive book explores in detail a wide range of topics within the public choice and constitutional political economy tradition providing a comprehensive overview of current work across the field The expert contributions are underpinned by the notion of moving economic thinking away from the analysis of the logic of a situation given a set of well established and well enforced rules of the game towards a deeper analysis of the logic behind the selection of the rules of the game themselves Within this context the theme of choice between rules as well as the more conventional analysis within rules across historical time and place and in various thought experiments and conceptual situations is explored in detail Extensive case studies back theory with empirical evidence and topics discussed include the foundations of constitutional economics constitutional political economy political competition and voting public choice and public policy and extensions to public choice theory This stimulating book will prove a thought provoking read for

academics and both under and post graduate students in the fields of economics particularly public choice and Austrian economics public policy and political science

MAA Notes ,1983 **Elemental: The New Geography of Climate Change and How We Survive it** Arthur Snell,2026-03-12 An extraordinary mastery of geopolitics combining years on the ground in the most challenging places a raw instinct for politics and a deep ethical concern for the world in the face of climate catastrophe A masterpiece RORY STEWART A powerful passionate and utterly convincing book LORD PETER RICKETTS From the water stressed mountains of the Arabian Peninsula to the wildfires raging through America s most populated regions the climate crisis is already affecting the lives of millions As natural disasters and increased scarcity shake the established world order to its core Elemental reveals an alternative future is still possible Within this century the new era of extreme weather will threaten India s ability to grow rice prevent southern Europe s farms from providing the continent with fresh produce and make building in Saudi Arabia near impossible While such unprecedented challenges inevitably drive conflict they will also encourage innovation upending economies and global power structures to create opportunities for new players and pioneering ways of living In this groundbreaking study Arthur Snell visits rapidly changing societies to show how we can live on a warming planet He presents a vision in which Africa powers Europe with solar energy where autocratic oil states are no more and new shipping routes across the melting Arctic bring Asia Europe and North America closer than ever before In Russia huge areas of highly fertile land will be exposed by the melting ice for whoever can seize it while China s stranglehold on rare minerals looks set to make it the world s leading superpower Through four sections Earth Air Fire and Water Elemental blends reportage with analysis and interviews with key experts policymakers and politicians to reveal the turbulent future we face and the choices we need to make to avert disaster
