Multiple Imputation For Nonresponse In Surveys:

Multiple Imputation for Nonresponse in Surveys Donald B. Rubin, 2004-06-09 Demonstrates how nonresponse in sample surveys and censuses can be handled by replacing each missing value with two or more multiple imputations Clearly illustrates the advantages of modern computing to such handle surveys and demonstrates the benefit of this statistical technique for researchers who must analyze them Also presents the background for Bayesian and frequentist theory After establishing that only standard complete data methods are needed to analyze a multiply imputed set the text evaluates procedures in general circumstances outlining specific procedures for creating imputations in both the ignorable and nonignorable cases Examples and exercises reinforce ideas and the interplay of Bayesian and frequentist ideas presents a unified picture of modern statistics

Estimation in Surveys with Nonresponse Carl-Erik Särndal, Sixten Lundström,2005-07-22 There is increasing interest in the study of nonresponse in statistical surveys as there is a need to reduce the level of nonresponse in order to increase the validity of the results and to deal with the problem of nonresponse once it has arisen It is possible to reduce the amount of nonresponse in a survey but not possible to avoid it completely Therefore there is a need for techniques that enable the survey statistician to estimate the level of nonresponse and adjust for it accordingly in order to improve the

results This book presents a practical overview of techniques for estimating nonresponse in statistical surveys and for adjusting for it once it has occurred It also covers the related topics of frame imperfections and coverage errors in surveys featuring many worked examples and implementation of the methods in a number of statistical software packages The text is based upon a manual developed at Statistics Sweden and used extensively by government statisticians working with data from real surveys Features Provides an overview of methods for the estimation of nonresponse in statistical surveys Covers a range of methods for nonresponse adjustment particularly reweighting and imputation Includes guidelines for dealing with frame imperfections and coverage errors Features worked examples throughout using real data Includes implementation of the methods in a range of statistical software It will appeal to researchers and practitioners analyzing data from statistical surveys Also suitable as supplementary reading for graduate students of survey statistics
