Digital Transformation Nirjhar Chakravorti, 2022-06-23 With the advent of digital technologies society is reshaping itself radically In the last decade digital technologies have brought fundamental changes in the industry and business environment The holistic socioeconomic and industrial changes are a result of general purpose technology aspects of digital transformation which are rare and have inherent capabilities of self transformation to bring long term benefits across the entire global business environment After the steam engine electric generator and printing press the recent development of digital transformation has created an opportunity with extensive sustainable and incremental influence for disruption and renovation However the most important difference between digital transformation and the previous general purpose technologies such as steam engines and electric generators is the pace of technology s penetration across the globe To cope with the accelerated speed of global digitization the digital transformation process should be accepted adopted and adapted across society and business utilizing a multi dimensional strategy This book illustrates a strategic structure that covers Digital Challenges for Industries Applicability for Digital Transformation Digital Transformation Framework People and Organization Structure Capability Delivery Activities and Life Cycle Benefits How will businesses embrace digital transformation How will organizations formulate a digital transformation strategy How will they invest in digital technologies To answer these questions a strategic structure is created which can provide guidelines to businesses to create a framework for digital transformation that includes strategy process governance and funding The exponential growth in data capacity storage process and communication due to rapid digitalization has created infinite opportunities and different dimensions to businesses Digital platforms have enabled alternative business models by deconstructing the traditional value chains Agile concepts driven by design thinking have brought innovative perspectives with an environment of boundless disruption To run a company with sustainability and manage disruptions more consciously the adoption of a digital platform with an appropriate strategy is the only viable option Digital transformation DX goals and strategies should be in line with a company s business objectives The strategic structure explained in the book is a global framework that can be adopted by any profit or nonprofit organization Like any other transformational process digital transformation has created structural tension between old and new In this tension employees play a large role and their clarity of thought regarding the transformation process is of paramount interest To overcome this tension companies need to orient as learning organizations which will provide opportunities for growth in an ambidextrous environment embraced with a digital ecosystem The book explains how the structural tension between old and new can be mitigated by effectively involving all stakeholders in the transformation process

*Autonomous* Vala Afshar, Henry King, 2025-09-30 A compelling roadmap to building an autonomous business best positioned to win using digital labor powered by Agentive and physical AI An autonomous business is designed to be AI first in its strategies and operations to maximize value and minimize time to value and when it is done right it will unlock

unprecedented speed scale and shared success But getting from one off AI implementations where most companies are at today to autonomy will be neither easy nor obvious Business leaders will need to challenge all the conventions standard operating procedures and orthodoxies underpinning businesses designed by humans for humans which is to say just about all of them They will need to build digital labor to non linearly scale the health conditioning and talent of their teams business and ecosystem enabling 24x7x365 continuity and responsiveness removing blockages and waste that trap or reduce value They will need to manage the relationships between the two types of intelligent resources digital and human They will need to design for AI control and teach human leaders to let go of the steering wheel The goal of Autonomous is to further expand the Boundless design principles that have guided the fastest growing companies in the world and to ready business leaders strategists and designers for success in the AI economy
