Introduction To Excel VBA Macros Using Visual Basic L.

Castelluzzo, 2019-08-16. This book teaches the reader how to begin using Visual Basic code to write and execute customized macros in Microsoft Excel. Topics include variables, worksheets, spreadsheet files, cell formulas, relative referencing, copying and pasting, finding cells with data, setting up a range for cell referencing, pivot tables, cell formatting, and much more. The intention is to teach the reader how to perform regular tasks in Excel using Visual Basic code instead of the regular manual method. This will allow the reader to perform their work thousands of times faster with no effort once they have finished writing their macro. All of the code in this book will be available for download from the Internet at <https://sites.google.com/view/questions-with-solutions-excel-vba-macro-code>. The code that has been provided in this book has been written as generically as possible in order to allow it to be used with minimal modification. It is not necessary for the user to memorize code, but it is very useful for the user to build a library of snippets which they tend to use most frequently and to become very familiar with their most commonly used macro code. This book also provides an opportunity to put this new code to work in the form of an assignment which involves writing a full macro. Details and instructions are provided, and the full solution is provided as well.
