Sketching For Architecture Interior Design :

Sketching for Architecture + Interior Design Stephanie Travis,2015-07-20 The debate surrounding hand drawing versus computer generated imagery has become a hot topic Having grown up with computers today s interior design and architecture students are extremely adept at creating computer imagery but often lack confidence in their freehand sketching skills or do not know how to sketch at all Sketching and the careful observation that it entails is essential for the successful development of the next generation of designers Forty five step by step exercises take the student from the simple three dimensional forms of furniture to interiors to complex building exteriors and cityscapes Technical topics covered include tools line weights perspective proportion composition shading serial views and context Exercises are illustrated with beautiful sketches specially created by the author Sketching for Architecture Interior Design is an indispensable and practical guide for students wishing to master the art of looking and sketching [Integrated Drawing Techniques](#) Robert Philip Gordon,2016-01-14 Since the appearance of simplified 3D sketching programs like SketchUp architects and interior designers have been called on to use both freehand and 3D CAD drawings often at very earliest stages of design Since we must often go back and forth between analytical plan views and 3D visual views it s important that this be a seamless process requiring little disruptive action or break in the workflow Integrated Drawing Techniques closes the gap between creativity and geometry teaching beginner architects and interior designers how to design their residential interiors using freehand sketching and computer aided design simultaneously From concept planning to 3D rendering this book is a comprehensive guide to designing residences by hand and computer [Basics Interior Architecture 03: Drawing Out the Interior](#) Ro Spankie,2009-05-27 Basics Interior Architecture 03 Drawing Out the Interior is a comprehensive introduction to the representation of interior space through drawing and modelling The book introduces the reader to a range of techniques and methods and describes when and where to use them Starting with what is meant by interior architecture and why designers draw in the first place it goes on to explore what one might draw and when The text is supported by detailed studies of contemporary work alongside activities and resources Starting with what is meant by interior architecture and why designers draw in the first place it goes on to explore what one might draw and when It considers the idea that the method we choose to draw with influences the way we think and therefore what we design It includes sketches and drawings from Le Corbusier Iannis Xenakis Mies van der Rohe and Carlo Scarpa [Drawn to Design](#) Eric Jenkins,2012-12-21 The book is a guide for students and teachers to understand the need for the role of and the methods and techniques of freehand analytical sketching in architecture The presentation focuses on drawing as an approach to and phase of architectural design The conceptual goal of this approach is to use drawing not as illustration or depiction but as exploration The first part of the book discusses underlying concepts of freehand sketching in design education and practice as a complement to digital technologies The main component is a series of chapters that constitute a typology of fundamental issues in architecture and

urban design for instance issues of facade are illustrated with sketch diagrams that show how facades can be explored and sketched through a series of specific questions and step by step procedures This book is especially timely in an age in which the false conflict between traditional vs digital gives way to multiple design tools including sketching It fosters understanding of the essential human ability to investigate the designed and the natural world through freehand drawing The author Eric Jenkins received several teaching awards and design awards He is Associate Professor at Catholic University of America s School of Architecture and Planning where he teaches design theory and analytical sketching He earned a Masters in Design Studies from Harvard University s Graduate School of Design and has previously published *To Scale One Hundred Urban Plans*
