Reading Classes Barbara Jensen, 2012-05-15 Discussions of class make many Americans uncomfortable This accessible book makes class visible in everyday life Solely identifying political and economic inequalities between classes offers an incomplete picture of class dynamics in America and may not connect with people s lived experiences In Reading Classes Barbara Jensen explores the anguish caused by class in our society identifying classism or anti working class prejudice as a central factor in the reproduction of inequality in America Giving voice to the experiences and inner lives of working class people Jensen a community and counseling psychologist provides an in depth psychologically informed examination of how class in America is created and re created through culture with an emphasis on how working and middle class cultures differ and conflict This book is unique in its claim that working class cultures have positive qualities that serve to keep members within them and that can haunt those who leave them behind Through both autobiographical reflections on her dual citizenship in the working class and middle class and the life stories of students clients and relatives Jensen brings into focus the clash between the realities of working class life and middle class expectations for working class people Focusing on education she finds that at every point in their personal development and educational history working class children are misunderstood ignored or disrespected by middle class teachers and administrators Education while often hailed as a way to cross classes brings with it its own set of conflicts and internal struggles These problems can lead to a divided self resulting in alienation and suffering for the upwardly mobile student Jensen suggests how to increase awareness of the value of working class cultures to a truly inclusive American society at personal professional and societal levels Class Cultures

and Social Mobility Paul Dean, 2025-11-11 Class Cultures and Social Mobility tells the stories of people who grew up working class became the first members of their family to graduate from college and undertook professional work that serves working class people Drawing upon personal narratives to appeal to both academics and first gen students themselves this book charts the class journeys of people across a wide range of occupational fields Their stories illustrate how members of the professional workforce draw upon their working class roots to construct meaningful careers aimed at building stability mobility and fulfillment for the next generation of working class people While their working class origins presented significant barriers along their career trajectories they also found ways to leverage their roots in their professional work Through their stories the author reveals the power of working class cultural capital how their unique knowledge skillsets and dispositions enabled them to leverage their humble beginnings as a strength for both themselves and their communities

Class Lives Chuck Collins, Jennifer Ladd, Maynard Seider, Felice Yeskel, 2014-12-18 Class Lives is an anthology of narratives dramatizing the lived experience of class in America It includes forty original essays from authors who represent a range of classes genders races ethnicities ages and occupations across the United States Born into poverty working class the middle class and the owning class and every place in between the contributors describe their class journeys in narrative form

recounting one or two key stories that illustrate their growing awareness of class and their place changing or stable within the class system The stories in *Class Lives* are both gripping and moving One contributor grows up in hunger and as an adult becomes an advocate for the poor and homeless Another acknowledges the truth that her working class father's achievements afforded her and the rest of the family access to people with power A gifted child from a working class home soon understands that intelligence is a commodity but finds his background incompatible with his aspirations and so attempts to divide his life into separate worlds Together these essays form a powerful narrative about the experience of class and the importance of learning about classism class cultures and the intersections of class race and gender *Class Lives* will be a helpful resource for students teachers sociologists diversity trainers activists and a general audience It will leave readers with an appreciation of the poignancy and power of class and the journeys that Americans grapple with on a daily basis

**Industrial and Labor Relations Review** ,2012-07 **Studies in Latin American Popular Culture** ,1983 *Discovering Reality* Sandra G. Harding, Merrill B. Hintikka, 1983-02-28 Are Western epistemology metaphysics

methodology and the philosophy of science grounded only in men's distinctive understandings of themselves, others, and nature. Does this less than human understanding distort our models of reason and of scientific inquiry? In different ways, the papers in this collection explore the evidence for these increasingly reasonable and intriguing questions. They identify how it is distinctively masculine perspectives on masculine experience which have shaped the most fundamental and formal aspects of systematic thought in philosophy and the natural and social sciences, precisely the aspects of thought believed most gender neutral. They show how these understandings ground Aristotle's biology and metaphysics, the very definition of the problems of philosophy in Plato, Descartes, Hobbes, and Rousseau, the adversary method which is the paradigm of philosophic and scientific reasoning, principles of individuation in philosophical ontology and the philosophy of language, individualistic assumptions in psychology, functionalism in sociological and biological theory, evolutionary theory, the methodology of political science, Marxist political economy, and conceptions of objective inquiry in the social and natural sciences. These essays also begin to identify for us the distinctive aspects of women's experience which can provide the resources needed for the creation of a truly human understanding. Audience: The book will be of interest to those involved in epistemology and philosophy of the natural and social sciences, as well as feminist scholars in philosophy. The work will also be of value for theorists, methodologists, and feminist scholars in the natural and social sciences. Current Index to Journals in Education, 1991

**Creating America** Jan Cohn, 1989. Before movies, radio, and television challenged the hegemony of the printed word, the Saturday Evening Post was the preeminent vehicle of mass culture in the United States. And to the extent that a mass medium can be the expression of a single individual, this magazine, with a peak circulation of almost three million copies a week, was the expression of its editor, George Horace Lorimer. Cohn shows how Lorimer made the Post into a uniquely powerful magazine that both celebrated and helped form the values of the time. **Subject Guide to Books in Print**, 1991

**The Rhetoric of Appropriation** Jill McKay Chrobak, 2007. *Ten Percent*, 1980-10. **Mirror Images** Webster Groves Writing Project, 1994. In the midwestern suburb of Webster Groves, Missouri, a team of middle and high school teachers, all female, all but one White, refused to accept the chronic underachievement of African American student writers. *Mirror Images* is their story. Through six years of action research, they realized that instead of trying to fix the kids, they needed to fix some other things: their teaching methods, the ambiance of their classrooms, and their own cultural awareness. The teachers' journey is one of self-reflection, painful at times, as they question, hypothesize, act, analyze results, and ultimately change. Hand in hand with their changes, readers follow the story of Antwan, James, and Damon, students who were seemingly disengaged from their classrooms, curriculum, and teacher. They change, too, becoming involved, active, guiding forces in their English classes. *Mirror Images* offers no recipes, no quick-fix solutions. Instead, it presents rich classroom experiences and a process that will help readers see their own hard-to-reach students with new eyes. Along with principles for good writing instruction, the authors explain key strategies for success with dozens of their own lessons and projects. Classroom teachers, as well as

instructional and staff development leaders who want to get beyond the standard advice on cultural sensitivity and students at risk must read this book Readers will be challenged as well as inspired by this view into real classrooms through mirrors of race class gender and self

Courts,1991-10-30 The first volume of the series Language and Ideology this work explores mature literacy Patrick L Courts argues that while by society s standards many people can read well they are unable to create meaning from the world of oral and written language His theory derives from psycho and sociolinguistics cognitive psychology philosophy literary criticism and whole language theory Courts criticizes programmed activities texts and workbooks challenging the control that commercial textbook publishers and test makers exert on education He shuns overemphasis on methods and offers an alternative approach firmly grounded in theory and aimed at empowering teachers and students Courts begins with a discussion of liberatory pedagogy drawing from whole language theory the social semiotics of Halliday reader response theory and the ideas of Heidegger and Derrida The subsequent methodological chapters build a case for what Courts calls a conservative revolution in literacy education teachers combining a sound base of theory with methodologies to tap students generative creative powers Courts s methodology aims to empower people as meaning makers This book is valuable to teachers and administrators textbook publishers and students of education
