

## Demonstration of Law of Reflection

The paper "Demonstration of Law of Reflection" is an excellent version of a lab report on physics. The purpose of the experiment was to explore and demonstrate the basic principles of reflection. The following equipment and materials were used during the experiment: Ruler, cardboard (8.5" by 11"), a small smart mirror, small wooden block, rubber bands, straight pins, and unlined white paper. A straight line was then drawn on the unlined white paper using a ruler. The drawn paper was then placed on a smooth piece of cardboard that was cut from a cardboard box. The drawn line was then labeled B one end and B' on the other end. A small flat mirror was attached to a small piece of a wooden block, and the combination placed along the drawn line (BB'). A straight pin was then stuck about 10cm from the mirror, after which a ruler was aligned with the pin's reflected image and a straight line (I) was drawn along the ruler. The line was then extended to meet line BB' at point P. A normal was then drawn from point P, and a line (R) drawn from point P to position of the pin. Angles I-P-N and R-P-N were measured, and several trials did. SKETCH
