Elicitation Strategies for Interviewing and Fieldwork: Emerging Research and Opportunities Clarke, Rodney J., 2018-12-26. Genre theory has been used to describe patterns within certain types of mass media, especially patterns associated with written and spoken language. These same methods can be applied to interviewing and the planning and creation of focus groups. Elicitation Strategies for Interviewing and Fieldwork: Emerging Research and Opportunities is a pivotal reference source that provides vital research on the application of textual strategies associated with initiating or eliciting texts and strategies for keeping responders on task. While highlighting topics such as microgenre, interview protocol, and cultural context, this publication explores interview techniques as well as the methods of using these strategies to keep interviews relevant. This book is ideally designed for academicians, researchers, journalists, communication specialists, and interviewers seeking current research on interview strategies and textual strategies important to recognizing and evaluating patterns within responses. **Research Methods in Language Acquisition** Barbara Lust, Maria Blume, 2016-11-07. Language acquisition research is challenging the intricate behavioral and cognitive foundations of speech are difficult to measure objectively. The audible components of speech, however, are quantifiable and thus provide crucial data. This practical guide synthesizes the author's decades of experience into a comprehensive set of tools that will allow students

and early career researchers in the field to design and conduct rigorous studies that produce reliable and valid speech data and interpretations The authors thoroughly review specific techniques for obtaining qualitative and quantitative speech data including how to tailor the testing environments for optimal results They explore observational tasks for collecting natural speech and experimental tasks for eliciting specific types of speech Language comprehension tasks are also reviewed so researchers can study participants interpretations of speech and conceptualizations of grammar Most tasks are oriented towards children but special considerations for infants are also reviewed as well as multilingual children Chapters also provide strategies for transcribing and coding raw speech data into reliable data sets that can be scientifically analyzed Furthermore they investigate the intricacies of interpretation so that researchers can make empirically sound inferences from their data and avoid common pitfalls that can lead to unscientific conclusions
