Robert Venturi Excerpts From Complexity And Contradiction:

Complexity and Contradiction in Architecture Robert Venturi, Museum of Modern Art (New York, N.Y.), 1966 Venturi presents his views on architecture as the conscious manipulation of the complexities contradictions and ambiguities of urban life in a technologically changing society Introducing Architectural Theory Korydon Smith, Miguel Guitart, 2013-05-20 This is the most accessible architectural theory book that exists Korydon Smith presents each common architectural subject such as tectonics use and site as though it were a conversation across history between theorists by providing you with the original text a reflective text and a philosophical text He also introduces each chapter by highlighting key ideas and asking you a set of reflective questions so that you can hone your own theory which is essential to both your success in the studio and your adaptability in the profession These primary source texts which are central to your understanding of the discipline were written by such architects as Le Corbusier Robert Venturi and Adrian Forty The appendices also have guides to aid your reading comprehension to help you write descriptively analytically and disputationally and to show you citation styles and how to do library based research More than any other architectural theory book about the great thinkers **Introducing Architectural Theory** teaches you to think as well
