**Bug Alert** Description Changing the startup form's name in a VB WinForms app does not update the Startup form 4517

**Explanation** In the latest Visual Basic update on GitHub Microsoft accidentally introduced a significant bug that you should be aware of In the Visual Basic project properties dialog on one of the tabs Application is a drop down box for selecting the startup object This can be either a Main method or a System.Windows.Forms.Instance or System.Windows.Window for WPF When you do a rename on a form say from the code editor in source or from the solution explorer currently set as the startup form the rename doesn't cascade to the startup object project property cause the project to enter an invalid state where the user must now manually reset this project property from the now nonexistent Form to the new name This is a huge annoyance The fix for the bug until Microsoft addresses can be found here <http://www.jamesfo>
