Test Driven Development Kent Beck,2022-03-25 Quite simply test driven development is meant to eliminate fear in application development While some fear is healthy often viewed as a conscience that tells programmers to be careful the author believes that byproducts of fear include tentative grumpy and uncommunicative programmers who are unable to absorb constructive criticism When programming teams buy into TDD they immediately see positive results They eliminate the fear involved in their jobs and are better equipped to tackle the difficult challenges that face them TDD eliminates tentative traits it teaches programmers to communicate and it encourages team members to seek out criticism However even the author admits that grumpiness must be worked out individually In short the premise behind TDD is that code should be continually tested and refactored Kent Beck teaches programmers by example so they can painlessly and dramatically increase the quality of their work

Extreme Programming Refactored: The Case Against XP featuring Songs of the Extremos takes a satirical look at the increasingly hyped extreme programming XP methodology. It explores some quite astonishing Extremo quotes that have typified the XP approach, quotes such as "XPers are not afraid of oral documentation", "Schedule is the customer's problem", "Dependencies between requirements are more a matter of fear than reality", and "Concentration is the enemy". In between the chuckles, though, there is a serious

analysis of XP's many flaws. The authors also examine C3, the first XP project whose team most of whom went on to get XP. The book deals shortly before C3's cancellation described themselves as the best team on the face of the Earth. In a later chapter the authors also note that one problem which can affect pair programmers is overconfidence or is that excessive courage. The authors examine whether the problems that led to C3's inexplicable cancellation could also afflict present day XP projects. In the final chapter Refactoring XP, Matt and Doug suggest some ways of achieving the agile goals of XP using some XP practices used in moderation combined with other less risk laden methods.
