Co-locating Transactional and Data Warehouse Workloads on System z Mike Ebbers, Dino Tonelli, Jason Arnold, Patric Becker, Yuan-Chi Chang, Willie Favero, Shantanu Kethireddy, Nin Lei, Shirley Lin, Ron Lounsbury, Susan Widing Lynch, Cristian Molaro, Deepak Rangarao, Michael Schapira, IBM Redbooks, 2010-12-03

As business cycles speed up many customers gain significant competitive advantage from quicker and more accurate business decision making by using real data For many customers choosing the path to co locate their transactional and analytical workloads on System z better leverages their existing investment in hardware software and skills We created a project to address a number of best practice questions on how to manage these newer analytical type workloads especially when co located with traditional transactional workloads The goal of this IBM Redbooks publication is to provide technical guidance and performance trade offs associated with resource management and potentially DB2 data sharing in a variety of mixed transactional data warehouse System z topologies The term co location used here and in the rest of the book is specifically defined as the practice of housing both transactional OLTP and data warehouse analytical workloads within the same System z configuration We also assumed that key portions of the transactional and data warehouse databases would reside on DB2 for z OS The databases may or may not reside in a DB2 data sharing environment we discuss those pros and cons in this book The intended audience includes DB2 data warehouse architects and practitioners who are facing choices in resource management and system topologies in the data warehouse arena This specifically includes Business Intelligence BI administrators DB2 database administrators DBAs and z OS performance administrators systems programmers In addition decision makers and architects can utilize this book to assist in making platform and database topology decisions The book is divided into four parts Part I Introducing the co location project covers the System z value proposition and why one should consider System z as the central platform for their data warehousing business analytics needs Some topics are risk avoidance via data consolidation continuous availability simplified disaster recovery IBM Smart Analytics Optimizer reduced network bandwidth requirements and the unique virtualization and resource management capabilities of System z LPAR z VM and WLM Part I also provides some of the common System z co location topologies along with an explanation of the general pros and cons of each This would be useful input for an architect

to understand where a customer is today and where they might consider moving to Part II Project environment covers the environment products workloads workload drivers and data models implemented for this study The environment consisted of a logically partitioned z10TM 32way running z VM Linux and z OS operating system instances On those instances we ran products such as z OS DB2 V9 IBM Cognos Business Intelligence Version 8 4 for Linux on System z InfoSphere™ Warehouse for System z InfoSphere Change Data Capture z OS WebSphere V7 Tivoli Omegamon for DB2 Performance expert Utilizing these products we created transactional OLTP data warehouse query and data warehouse refresh workloads All the workloads were based on an existing web based transactional Bookstore workload that s currently utilized for internal testing within the System p and z labs While some IBM Cognos BI and ISWz product usage and experiences information is covered in this book we do not go into the depth typically found in IBM Redbooks publications since there s another book focused specifically on that

A Primer on SAP Implementation F. Robert Jacobs, D. Clay Whybark, 2000-01-06 Why ERP is not a traditional textbook designed for a specified course it is patterned after the wildly successful short novel The Goal by Eli Goldratt The Goal is currently required reading in many undergraduate MBA and executive courses Like The Goal Why ERP is a short novel about a manager in a furniture manufacturing business who is charged with learning about and implementing a new ERP system particularly SAP R 3 The story tells of his experience learning about it his considering other installations as examples and then his deciding the key issues and how to proceed Incorporated into the story is a concise introduction to the basic concepts and architecture of ERP systems including actual screen shots of R 3 modules Though this is NOT a programming book it is a quick read overview and it can be assigned even for systems majors as a background reading to lay out the managerial issues and build a basic understanding of the concepts prior to doing actual technical programming or hands on R 3 projects Through the eyes of the hero in the novel the reader is presented with all the related implementation and

business issues Intended to provide a non technical non programming introduction this book can stand alone as a quick read or self study introduction for any manager or business student The text is also great for schools who do NOT have any SAP Oracle PeopleSoft or other ERP system on campus and who have no access to online or hands on samples or examples This book can provide the needed literacy and awareness of what ERP is and why it matters **NetWare Training Guide** Karanjit Siyan,1994 Tutorials and self study make this guide the essential deskmate for future NetWare engineers studying for Novell s certification course on the NetWare administration which is becoming required training for all future LAN administrators **Sams Teach Yourself SAP R/3 in 24 Hours** Danielle Larocca,1999 A reference for end users accounting clerks sales reps shipping and receiving clerks human resources employees etc who merely use SAP as a tool to get their job done this text features coverage is aimed at immediate material so that end users can get back to work on their job functions with the SAP software
