Antimicrobial Peptides Luis H. Reyes, Juan C. Cruz, Gregory R. Wiedman, 2024-11-22 Antimicrobial Peptides A Roadmap for Accelerating Discovery and Development covers the most important efforts of scientists and engineers worldwide to accelerate the process of discovery production and eventual market penetration of more potent antimicrobial peptides These efforts have been fueled by emerging technologies such as artificial intelligence and data science molecular and CFD simulations easy to use process simulation packages microfluidics 3D printing among many others Such technologies can now be implemented and scaled up quickly and at relatively low cost in low budget production facilities critical to moving to sustainable and marketable products worldwide Discovering novel antimicrobial peptides rationally and cost effectively has emerged as one of the significant challenges of modern biotechnology Thus far this process has been tedious and costly resulting in molecules with activities far below those needed to address the current challenge of microbial resistance to antibiotics that takes the lives of thousands of people around the world every year Finally the book also highlights how multidisciplinary teams have assembled to address the challenges of manufacturing biological testing and clinical trials to finally reach complete translation Covers computational tools including emerging artificial intelligence algorithms and microfluidic systems for discovery and high throughput screening of AMPs Discusses the application of bioprocess engineering scale up approaches for AMPs production and purification with the aid of process simulation tools and rapid prototyping Highlights user centered design and formulation of products with AMPs Describes the whole pipeline for AMPs production

General Technical Report RM., 1997 **Encyclopedia of Agriculture and Food Systems** Neal K. Van Alfen, 2014-07-29 Encyclopedia of Agriculture and Food Systems Second Edition Five Volume Set addresses important issues by examining topics of global agriculture and food systems that are key to understanding the challenges we face Questions it addresses include Will we be able to produce enough food to meet the increasing dietary needs and wants of the additional two billion people expected to inhabit our planet by 2050 Will we be able to meet the need for so much more food while simultaneously reducing adverse environmental effects of today s agriculture practices Will we be able to produce the additional food using less land and water than we use now These are among the most important challenges that face our planet in the coming decades The broad themes of food systems and people agriculture and the environment the science of agriculture agricultural products and agricultural production systems

are covered in more than 200 separate chapters of this work The book provides information that serves as the foundation for discussion of the food and environment challenges of the world An international group of highly respected authors addresses these issues from a global perspective and provides the background references and linkages for further exploration of each of topics of this comprehensive work Addresses important challenges of sustainability and efficiency from a global perspective Takes a detailed look at the important issues affecting the agricultural and food industries today Full colour throughout
