Product Life-Cycle Management Max Giordano,Luc Mathieu,François Villeneuve,2012-12-17 This book gives a comprehensive view of the most recent major international research in the field of tolerancing and is an excellent resource for anyone interested in Computer Aided Tolerating It is organized into 4 parts Part 1 focuses on the more general problems of tolerance analysis and synthesis for tolerancing in mechanical design and manufacturing processes Part 2 specifically highlights the simulation of assembly with

defects and the influence of tolerances on the quality of the assembly Part 3 deals with measurement aspects and quality control throughout the life cycle Different measurement technologies and methods for estimating uncertainty are considered In Part 4 different aspects of tolerancing and their interactions are explored from the definition of functional requirement to measurement processes in a PLM approach

Data Strategy Sid Adelman, Larissa Terpeluk Moss, Majid Abai, 2005 Without a data strategy the people within an organization have no guidelines for making decisions that are absolutely crucial to the success of the IT organization and to the entire organization The absence of a strategy gives a blank check to those who want to pursue their own agendas including those who want to try new database management systems new technologies often unproven and new tools This type of environment provides no hope for success Data Strategy should result in the development of systems with less risk higher quality systems and reusability of assets This is key to keeping cost and maintenance down thus running lean and mean Data Strategy provides a CIO with a rationale to counter arguments for immature technology and data strategies that are inconsistent with existing strategies This book uses case studies and best practices to give the reader the tools they need to create the best strategy for the organization
