A History of Abstract Algebra Jeremy Gray, 2018-08-07 This textbook provides an accessible account of the history of abstract algebra tracing a range of topics in modern algebra and number theory back to their modest presence in the seventeenth and eighteenth centuries and exploring the impact of ideas on the development of the subject Beginning with Gauss s theory of numbers and Galois s ideas the book progresses to Dedekind and Kronecker Jordan and Klein Steinitz Hilbert and Emmy Noether Approaching mathematical topics from a historical perspective the author explores quadratic forms quadratic reciprocity Fermat s Last Theorem cyclotomy quintic equations Galois theory commutative rings abstract fields ideal theory invariant theory and group theory Readers will learn what Galois accomplished how difficult the proofs of his theorems were and how important Camille Jordan and Felix Klein were in the eventual acceptance of Galois s approach to the solution of equations The book also describes the relationship between Kummer s ideal numbers and Dedekind s ideals and discusses why Dedekind felt his solution to the divisor problem was better than Kummer s Designed for a course in the history of modern algebra this book is aimed at undergraduate students with an introductory background in algebra but will also appeal to researchers with a general interest in the topic With exercises at the end of each chapter and appendices providing material difficult to find elsewhere this book is self contained and therefore suitable for self study [Modern Algebra and](#)

[the Rise of Mathematical Structures](#) Leo Corry, 2012-12-06 The book describes two stages in the historical development of the notion of mathematical structures first it traces its rise in the context of algebra from the mid nineteenth century to its consolidation by 1930 and then it considers several attempts to formulate elaborate theories after 1930 aimed at elucidating from a purely mathematical perspective the precise meaning of this idea First published in the series Science Networks
