

Chapter 8

Cash and Internal Controls

QUESTIONS

1. The seven broad principles are: Responsibilities should be clearly established; Adequate records should be maintained; Assets should be insured and employees bonded; Recordkeeping and custody of assets should be separated; Responsibilities for related transactions should be divided; Technology should be used where practicable; Regular and independent reviews of internal control procedures should be performed.
2. Responsibility for related transactions should be divided so that the work of one department or individual acts as a check on that of another.
3. Internal control procedures become especially critical when the manager of a business can no longer control the business through personal supervision and direct participation.
4. Most liquid is cash. Least liquid is a building.
5. Separation of custody from recordkeeping of an asset encourages the *asset custodian* to avoid misplacing, misappropriating, or wasting the asset. This arrangement makes collusion necessary if an asset is to be stolen and the theft concealed in the records.
6. If individual departments were permitted to deal directly with suppliers, the amount of merchandise purchased and the resulting liabilities would not be well controlled. Having individual departments place orders through a purchasing department helps control the amounts purchased and the resulting liabilities.
7. A petty cash receipt is a document stating that a payment has been made from petty cash. The one who received payment and the one who approved payment both sign the receipt.
8. Depositing all receipts on the day of receipt (1) creates an independent record of the amount of cash received and (2) helps prevent an employee from having personal use of the money for a period of time before depositing it.
9. During the year ended February 2, 2003, cash (and equivalents) of \$94,574,000 is used by investing activities. Cash (and equivalents) of \$53,837,000 is provided by financing activities.
10. Tastykake's Cash at December 28, 2002, equals \$281,685. Its Accounts Receivable of \$20,881,597 and its Inventory of \$6,777,152 and Deferred Income Taxes and Prepayments are considerably larger. Stated another way, for 2002, Accounts Receivable comprise about 58% of current assets, Inventory comprises around 19%, Deferred Income Taxes and Prepayments comprise 22% and Cash comprises less than 1% of current assets. For 2001, Accounts Receivable comprises 63% of current assets, Inventory comprises around 24%, Deferred income taxes and prepayments comprise 12% and Cash comprises only 1% of current assets.
