learning
languages

AFFECTS OUR
BRAIN

As travel experiences go, there are few things as satisfying as successfully ordering a meal in a foreign language.

But while the practical and social aspects are obvious, multilingualism also has a transformative effect on the brain – improving brain power and changing the way we see the world.

The Effect of Community Context on Intergenerational Spanish Maintenance and English Proficiency Among Latina and Latino Children Nancy Alison Garrett, 1997 In this dissertation I investigate how community context affects Spanish language use and English proficiency among Latina and Latino children in the United States focusing on the children of immigrants I view children's language attributes through a sociological perspective that recognizes that children learn and use languages within specific social and cultural contexts and that these contexts have an important effect on language acquisition and use This theoretical perspective leads to the hypothesis that children's language skills and language use will be affected by the communities they live in I predict that living in a metropolitan area with a greater propinquity and availability of Spanish speakers will increase a child's likelihood of speaking Spanish because this will increase opportunities for using and hearing Spanish and promote Spanish within a larger United States context that often devalues languages other than English At the same time I hypothesize that community context will have little effect on children's English skills because of the ubiquitous presence of English in the daily life of any U S child I test these hypotheses using a national sample of children who live in metropolitan areas drawn from the 1990 Census I find that levels of Spanish maintenance are extremely high among children of Latino immigrants and that a large majority of children who are born in the U S speak English fluently Multivariate analysis demonstrates that several dimensions of a metropolitan area's language context in particular the saturation and segregation of Spanish speakers have a strong effect on second generation children's likelihood of speaking Spanish that persists even after controlling for household and individual level variables Contrary to my original hypothesis I also find that the language characteristics of the metropolitan area have a significant effect on children's English

proficiency This effect however is smaller than the effect of metropolitan context on Spanish use This analysis produces a better understanding of the specific elements of household and community context that affect language use The results imply that children of immigrants are following multiple paths to language adaptation and that metropolitan context is an important influence on this process of adaptation

The Neurobiology of Affect in Language Learning John H. Schumann,1999-06-18 This book presents a theory of how the psychology and neurobiology of stimulus appraisal influences the variability in second language acquisition It then

extends the notion of affect developed for second language acquisition to primary language acquisition and to cognition in general. Written by one of the leading scholars in the field, this book is an important research tool for students and professors of language studies and linguistics.

Cognitive and Educational Psychology for TESOL Andrzej Cirocki, Bimali Indrarathne, Sharon McCulloch, 2024-08-19. This volume has been written specifically with TESOL teacher educators, practitioners, and classrooms in mind. It is divided into three sections: cognitive aspects of language learning, individual differences, and language learning difficulties and challenging behaviours. Structured in this way, it enables TESOL teacher educators and practitioners to better understand how language learners process and retain new information, improving their overall ability to learn and remember. In addition to supporting TESOL teacher educators and practitioners in promoting effective language learning, this volume explains individual differences among language learners and the importance of developing learners' emotional, social, and behavioural skills while addressing learning difficulties, disorders, disabilities, and challenging behaviours whenever required. The individual chapters are written in an accessible style to enable readers to explore various psychological concepts in their pedagogical practice by engaging in reflective teaching through action research. This volume is a vital resource for pre- and in-service language teachers and will encourage language teacher educators to reassess their existing practices. Chapter 2 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

[The Role of the Self in Language Learning](#) Jülide İnözü, Sehnaz Sahinkarakas, 2017-11-06. The role played by concepts of the Self in the learning of languages has recently received increasing attention in academic studies. In the same way that fingerprints represent each person's uniqueness, the self here is related to the uniqueness of learners, the way they receive and transmit their identity in the teaching and learning process. It is this uniqueness that brings dynamism, challenge, and inspiration to learning and teaching. By focusing on language learners' self-concept, this book foregrounds the role of the learner in the process of language learning. It presents a number of empirical studies that bring into focus various aspects of the self and will, as such, be of interest to EFL teachers, researchers, and the general reader interested in the self and its effects on learners' approaches, motivation, and interest in foreign language learning.
