**Economics Working Papers: a Bibliography** ,1985 **Fourth Estate** ,1916 **ICT Investment for Energy Use in the Industrial Sectors** Nabaz T. Khayyat,2017-06-20 This book investigates the impact of production input factors on the market consumer and producer energy demand characteristics in 30 industrial sectors for South Korea over the period 1980 2009 and for Japan over the period 1973 2006 with special emphasis placed on the effects of ICT investment on the demand for energy A dynamic factor demand model is developed accounting for the adjustment costs that are defined in terms of forgone output from current production It addresses four key aspects of production and energy demand in manufacturing first it establishes the various relationships between different factors of production Second it investigates whether the energy demand in the industrial sectors in South Korea would be decreased or increased by substituting

complementing with other input factors such as ICT capital and labor Third it looks at sources of growth in the industrial sectors through decomposing the Divisia index based total factor productivity TFP Finally it provides appropriate policy recommendations based on these findings The results of this study may provide industrial sectors stakeholders and environmental and industrial policy makers with a flexible model that has the capacity to assess outcomes of various policies under certain scenarios The factor demand methodology described in this book is very advanced and up to date It can be used when teaching advanced graduate courses and in empirically advanced research Therefore it is highly relevant in both teaching as a main or supplementary text and in particular as a reference handbook in conducting empirical research The focus on ICT effects on energy use makes this book an important addition to the existing literature on industrial development
