Wilke,2019-03-18 Effective visualization is the best way to communicate information from the increasingly large and complex datasets in the natural and social sciences But with the increasing power of visualization software today scientists engineers and business analysts often have to navigate a bewildering array of visualization choices and options This practical book takes you through many commonly encountered visualization problems and it provides guidelines on how to turn large datasets into clear and compelling figures What visualization type is best for the story you want to tell How do you make informative figures that are visually pleasing Author Claus O Wilke teaches you the elements most critical to successful data visualization Explore the basic concepts of color as a tool to highlight distinguish or represent a value Understand the importance of redundant coding to ensure you provide key information in multiple ways Use the book s visualizations directory a graphical guide to commonly used types of data visualizations Get extensive examples of good and bad figures Learn how to use figures in a document or report and how employ them effectively to tell a compelling story [Statistical Graphics for Univariate and Bivariate Data](#) William G. Jacoby,1997-02-24 Graphical displays that researchers can employ as an integral part of the data analysis process are frequently more revealing than traditional numerical summary statistics Providing strategies for examining data more effectively this volume focuses on univariate methods such as histograms smoothed histograms univariate scatterplots quantile plots box plots dot plots It describes bivariate methods such as scatterplot construction guidelines jittering for overplotted points marginal boxplots scatterplot slicing the Loess procedure for nonparametric scatterplot smoothing and banking to 45 degrees for enhanced visual perception **Visualization of Categorical Data** Jörg Blasius,Michael Greenacre,1998-02-09 A unique and timely monograph Visualization of Categorical Data contains a useful balance of theoretical and practical material on this important new area Top researchers in the field present the books four main topics visualization correspondence analysis biplots and multidimensional scaling and contingency table models This volume discusses how surveys which are employed in many different research areas generate categorical data It will be of great interest to anyone involved in collecting or analyzing categorical data Correspondence
