Construction of Road Swamy Sr, Swamy Rk, 2019-08-07 Roadworks called road work or road construction in the United States occur when part of the road or in rare cases the entire road has to be occupied for work relating to the road most often in the case of road surface repairs In the United States road work could also mean any work conducted in close proximity of travel way thoroughfare such as utility work or work on power lines i e telephone poles The general term of road work is known as work zone Roadworks can however also happen when a major accident occurs and

road debris from the crash needs to be cleared Roadworks are often signposted although it is possible that the signage comes too late or too sudden or is missing Typical road work traffic controls are temporary signs traffic cones barrier boards and top bollards as well as other forms of warning devices There are standards of temporary traffic control maintenance of traffic established in each country for various type of road work n some countries where lanes must be altered so as to accommodate roadworks the new lanes or interim lanes are marked with a different colour and take precedence over the previous lanes In Germany Poland and many other European countries it is yellow in Switzerland and in Ireland it is orange Roadworks are frequently carried out throughout the night so as to minimize traffic disruption Currently there are very few sources of accurate roadworks information sites available that report on the status of current works and future works In the UK the Roadworks org website an initiative run by ELGIN aims to provide a national and live dataset of roadworks for the purpose of coordination and reporting It includes roadworks information supplied by Local Authorities and national agencies like the Highways Agency 1 The methods of constructing roads have changed a lot since the first roads were built around 4 000 BC made of stone and timber The first Roman roads were stone paved built in North Africa and Europe for military operations Road construction techniques were gradually improved by the study of road traffic stone thickness road alignment and slope gradients developing to use stones that were laid in a regular compact design and covered with smaller stones to produce a solid layer Modern roads tend to be constructed using asphalt and or concrete Very broadly the construction of roads can be described by three processes Setting out Earthworks Paving construction This is carried out following the dimensions specified in layout drawings
