Energy Efficiency in Manufacturing Systems Sebastian Thiede, 2012-04-23 Energy consumption is of great interest to manufacturing companies. Beyond considering individual processes and machines, the perspective on process chains and factories as a whole holds major potentials for energy efficiency improvements. To exploit these potentials, dynamic interactions of different processes as well as auxiliary equipment (e.g. compressed air generation) need to be taken into account. In addition, planning and controlling manufacturing systems require balancing technical, economic, and environmental objectives. Therefore, an innovative and comprehensive methodology with a generic energy flow oriented manufacturing simulation environment as a core element is developed and embedded into a step-by-step application cycle. The concept is applied in its entirety to a wide range of case studies such as aluminium die casting, weaving mills, and printed circuit board assembly in order to demonstrate the broad applicability and the benefits that can be achieved.

Discrete-event System Simulation, 2010* **Ethernet-basierte Fahrzeugnetzwerkarchitekturen für zukünftige Echtzeitsysteme im Automobil** Till Steinbach, 2018-09-11 Till Steinbach leistet einen Beitrag zum Design und zur Bewertung neuer Ethernet-basierter Fahrzeugnetzwerkarchitekturen. Er liefert Werkzeuge für die simulationsbasierte Analyse und Beurteilung von Netzwerkarchitekturen und evaluiert anhand konkreter Anwendungen und auf echten Verkehrsdaten aufbauender Szenarien mögliche Netzwerkdesigns und Konfigurationen. Dabei berücksichtigt der Autor auch den Übergang von Legacy-Technologien hin zu einem rein Echtzeit-Ethernet-basierten Fahrzeugnetzwerk. Auf Basis der aus analytischen Modellen sowie Simulationsstudien und einem realen Fahrzeugprototyp gewonnenen Erkenntnisse spricht er Designempfehlungen für die Entwicklung zukünftiger Ethernet-basierter Fahrzeugnetzwerke aus. Die Ergebnisse der Untersuchung führen zu Best Practices für zukünftige Backbone-Netzwerke im Automobil, in denen sich die erreichbaren Kennzahlen unter Einhaltung der Designempfehlungen um ein Vielfaches verbessern lassen. Preise: Die Dissertation von Till Steinbach wurde 2018 von der IAV GmbH Ingenieurgesellschaft Auto und Verkehr Berlin mit dem in der Branche renommierten IAV Talent Award in der Kategorie Excellence ausgezeichnet. Der Autor Till Steinbach ist Teamleiter für

Software Integration und Echtzeitsysteme bei einem mittelständischen Automobilzulieferer in Hamburg Zuvor war er Doktorand in einer Kooperation der Carl von Ossietzky Universität Oldenburg und der HAW Hamburg 2011 wurde er mit dem Hermann Appel Preis ausgezeichnet

represent the simulation process from problem formulation to implementation and documentation The book presents the necessary level of detail required to fully develop a model that produces meaningful results and considers the tools necessary to interpret those results Sufficient background information is provided so that the underlying concepts of simulation are understood Major topics covered in Discrete Event Simulation include probability and distributional theory statistical estimation and inference the generation of random variates verification and validation techniques time management methods experimental design and programming language considerations The book also examines distributed simulation and issues related to distributing the physical process over a network of tightly coupled processors Topics covered in this area include deadlock synchronization rollback event management and communication processes Fully worked examples and numerous practical exercises have been drawn from the engineering disciplines and computer science although they have been structured so that they will be useful as well to other disciplines such as economics business administration and management science The presentation of techniques and methods in Discrete Event Simulation make it an ideal text reference for all practitioners of discrete event simulation

Parallel and Distributed Discrete Event Simulation Carl Tropper,2002 Discrete event simulation has long been an integral part of the design process of complex engineering systems and the modelling of natural phenomena Many of the systems that we seek to understand or control can be modelled as digital systems In a digital model we view the system at discrete instants of time in effect taking snapshots of the system at these instants For example in a computer network simulation an event can be the sending of a message from one node to another node while in a VLSI logic simulation the arrival of a signal at a gate may be viewed as an event Digital systems such as computer systems are naturally susceptible to this approach However a variety of other systems may also be modelled this way These include transportation systems such as air traffic control systems epidemiological models such as the spreading of a virus and military war gaming models This book is representative of the advances in this field

Discrete-Event System Simulation 4Th Ed Banks, **Discrete-event System Simulation Using Occam** Lin Shioh Fen Huang,1989 **Discrete Event Simulation Using ExtendSim 8** Jeffrey Strickland,2013-03 This text presents the basic concepts of discrete event simulation using ExtendSim 8 The book can be used as either a desk reference or as a textbook for a course in discrete event simulation This book is intended to be a blend of theory and application presenting just enough theory to understand how to build a model designs a simulation experiment and analyze the results Most of the text is devoted to building models with ExtendSim 8 starting with a simple single server queue and culminating with a transportation depot for package transfer and delivery I have built all the models contained in this book with ExtendSim 8 LT which limits the number of modeling blocks but otherwise has the required ExtendSim 8 capabilities Each chapter contains practical exercises and problems at the end of the chapters ExtendSim 8 LT is not included in this book Students may obtain ExtendSim 8 LT from Imagine That Inc
